USMCA

11. United States-Mexico-Canada Agreement.

- (a) Goods originating in the territory of a country named herein, pursuant to the United States-Mexico-Canada Agreement (USMCA), are subject to duty as provided herein, including any treatment set forth in subchapter XXIII of chapter 98 and subchapter XXII of chapter 99 of the tariff schedule. For the purposes of this note, as provided in the tariff schedule--
- (i) Goods that originate in the territory of Mexico, Canada or the United States (hereinafter referred to as "USMCA country" or "USMCA countries" as further defined in subdivision (l)(xxiv) of this note) under the terms of subdivision (b) of this note and regulations issued by the Secretary of the Treasury (including Uniform Regulations provided for in the USMCA), and goods enumerated in subdivision (p) of this note, when such goods are imported into the customs territory of the United States and are entered under a subheading for which a rate of duty appears in the "Special" subcolumn, followed by the symbol "S" in parentheses, are eligible for such duty rate, in accordance with section 202 of the United States-Mexico-Canada Agreement Implementation Act; and
 - (ii) Goods that originate in the territory of a USMCA country under the terms of subdivision (b) of this note and regulations issued by the Secretary of the Treasury, when such goods are imported into the customs territory of the United States and are entered under a subheading for which a rate of duty appears in the "Special" subcolumn, followed by the symbol "S+" in parentheses, or under a subheading whose article description provides for originating goods of one or more USMCA countries, as the case may be, are eligible for such duty rate, in accordance with section 202 of the United States-Mexico-Canada Agreement Implementation Act.
- (b) For the purposes of this note, a good imported into the customs territory of the United States from the territory of a USMCA country, as defined in subdivision (l) of this note, is eligible for the preferential tariff treatment provided for in the applicable subheading and quantitative limitations set forth in the tariff schedule as a "good originating in the territory of a USMCA country" only if--
- (i) the good is a good wholly obtained or produced entirely in the territory of one or more USMCA countries;
 - (ii) the good is a good produced entirely in the territory of one or more USMCA countries, exclusively from originating materials;
 - (iii) the good is a good produced entirely in the territory of one or more USMCA countries using nonoriginating materials, if the good satisfies all applicable requirements set forth in this note (including the provisions of subdivision (o)); or
 - (iv) except for a good provided for in any of chapters 61 through 63—
 - (A) the good is produced entirely in the territory of one or more USMCA countries;
 - (B) one or more of the nonoriginating materials provided for as parts under the tariff schedule and used in the production of the good do not satisfy the requirements set forth in this note because—
 - (1) both the good and its materials are classified under the same subheading or under the same heading that is not further subdivided into subheadings; or
 - (2) the good was imported into the territory of a USMCA country in unassembled form or disassembled form but was classified as an assembled good pursuant to general rule of interpretation 2(a) of the tariff schedule, and
 - (C) the regional value content of the good, determined in accordance with subdivision (c) of this note, is not less than 60 percent if the transaction value method is used, or not less than 50 percent if the net cost method is used,and such good satisfies all other applicable provisions of this note.
- For purposes of determining whether a remanufactured good is an originating good, a recovered material derived in the territory of one or more USMCA countries shall be treated as originating if the recovered material is used or consumed in the production of, and incorporated in, the remanufactured good.
- (c) [Format adjusted for alignment.]
- (i) Regional value content-- Except as provided in subdivision (c)(v) of this note, the regional value content of a good shall be calculated, at the choice of the importer, exporter or producer of such good, on the basis of—

GN p.2

USMCA

- (A) the transaction value method set out in subdivision (c)(ii) or
- (B) the net cost method set out in subdivision (c)(iii).

(ii) Transaction value method.--- An importer, exporter or producer of a good may calculate the regional value content of the good on the basis of the following transaction value method:

$$RVC = ((TV-VNM)/TV) \times 100$$

where RVC means the regional value content of the good, expressed as a percentage; TV means the transaction value of the good adjusted to exclude any costs incurred in the international shipment of the good; and VNM means the value of nonoriginating materials, including materials of undetermined origin, used by the producer in the production of the good.

(iii) Net cost method.-- An importer, exporter or producer of a good may calculate the regional value content of a good on the basis of the following net cost method:

$$RVC = ((NC - VNM)/NC) \times 100$$

where NC means the net cost of the good; RVC means the regional value content, expressed as a percentage; and VNM is the value of nonoriginating materials, including materials of undetermined origin, used by the producer in the production of the good.

(iv) Value of nonoriginating materials.

(A) In general.--The value of non-originating materials used by the producer in the production of a good shall not, for purposes of calculating the regional value content of the good under subdivision (c)(ii) or (c)(iii) of this note, include the value of nonoriginating materials used or consumed to produce originating materials that are subsequently used in the production of the good.

(B) Special rule for certain components.—The following components of the value of nonoriginating materials used by the producer in the production of a good may be counted as originating content for purposes of determining whether the good meets the regional value content requirement set forth in subdivision (c)(ii) or (c)(iii) of this note:

- (1) The value of processing the nonoriginating materials undertaken in the territory of one or more USMCA countries; and
- (2) The value of any originating materials used or consumed in the production of the nonoriginating materials undertaken in the territory of one or more USMCA countries.

(v) Net cost method required in certain cases.—An importer, exporter or producer of a good shall calculate the regional value content of a good solely on the basis of the net cost method set out in subdivision (c)(iii) of this note if the rule for the good set forth in subdivision (o) of this note includes a regional value content requirement not based on the transaction value method described in subdivision (c)(ii) above.

(vi) Net cost method allowed for adjustments.

(A) In general.---If an importer, exporter, or producer of a good calculates the regional value content of the good on the basis of the transaction value method described in subdivision (c)(ii) above and a USMCA country subsequently notifies the importer, exporter, or producer, during the course of a verification conducted in accordance with chapter 5 or 6 of the USMCA, that the transaction value of the good or the value of any material used in the production of the good must be adjusted or is unacceptable under article 1 of the Customs Valuation Agreement, the importer, exporter or producer may calculate the regional value content of the good on the basis of the net cost method described in subdivision (c)(iii).

(B) Review of adjustment.—Nothing in paragraph (vi)(A) above shall be construed to prevent any review or appeal available in accordance with article 5.15 of the USMCA with respect to an adjustment to or a rejection of—

- (1) the transaction value of a good; or
- (2) the value of any material used in the production of a good.

- (vii) Calculating net cost.—The producer of a good may, consistent with regulations implementing this note, calculate the net cost of the good under subdivision (c)(iii) of this note by—
- (A) Calculating the total cost incurred with respect to all goods produced by that producer, subtracting any sales promotion, marketing, and after-sales services costs, royalties, shipping and packing costs, and nonallowable interest costs that are included in the total cost of those goods, and then reasonably allocating the resulting net cost of those goods to the good;
 - (B) Calculating the total cost incurred with respect to all goods produced by that producer, reasonably allocating the total cost to the good, and subtracting any sales promotion, marketing and after sales service costs, royalties, shipping and packing costs, and nonallowable interest costs, that are included in the portion of the total cost allocated to the good, or
 - (C) Reasonably allocating each cost that is part of the total cost incurred with respect to the good so that the aggregate of those costs does not include any sales promotion, marketing, and after-sales services costs, royalties, shipping and packing costs, and nonallowable interest costs.
- (viii) Value of materials used in production.—For purposes of calculating the regional value content of a good under this note, applying the de minimis rules under subdivision (e) of this note, and calculating the value of nonoriginating components in a set under subdivision (i) of this note the value of a material used in the production of a good is—
- (A) In the case of a material that is imported by the producer of the good—
 - (1) the transaction value of the material at the time of importation, including the costs incurred in the international shipment of the material; or
 - (2) if the transaction value of the material at the time of importation is not acceptable or if there is no transaction value in accordance with 19 U.S.C. 1401a, the value of the material must be determined in accordance with the Uniform Regulations with respect to the importation of that material and, if the costs referred to in subsection (x) are included in that value, those costs may be deducted from that value.
 - (B) In the case of a material acquired in the territory in which the good is produced—
 - (1) The price paid or payable by the producer in the USMCA country where the producer is located;
 - (2) The value as determined under subparagraph (A), as set forth in regulations prescribed by the Secretary of the Treasury providing for the application of transaction value in the absence of an importation by the producer; or
 - (3) The earliest ascertainable price paid or payable in the territory of the country; or
 - (C) In the case of a self-produced material, the sum of—
 - (1) All expenses incurred in the production of the material, including general expenses; and
 - (2) An amount for profit equivalent to the profit added in the normal course of trade or equal to the profit that is usually reflected in the sale of goods of the same class or kind as the material.
- (ix) Intermediate materials.
- (A) In general.—Any self-produced material that is used in the production of a good may be designated by the producer of the good as an intermediate material for purposes of calculating the regional value content of the good under subdivision (c)(ii) or (c)(iii) above.
 - (B) Materials used in production of intermediate materials.—Subject to the regulations implementing this note, if a self-produced material is designated as an intermediate material under subparagraph (A) for purposes of calculating a regional value content requirement, no other self-produced material subject to a regional value content requirement used or consumed in the production of that intermediate material may be designated by the producer as an intermediate material.

- (x) Further adjustments to the value of materials.—The following expenses, if included in the value of a nonoriginating material or material of undetermined origin calculated under subdivision (c)(viii) of this note, may be deducted from the value of the nonoriginating material:
- (A) The costs of freight, insurance, packing, and all other costs incurred in transporting the material to the location of the producer.
 - (B) Duties, taxes, and customs brokerage fees on the material paid in the territory of one or more USMCA countries, other than duties or taxes that are waived, refunded, refundable, or otherwise recoverable, including credit against duty or tax paid or payable.
 - (C) The cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or byproducts.
- (d) Accumulation.
- (i) Producers.—A good that is produced in the territory of one or more USMCA countries, by one or more producers, is an originating good if the good satisfies the requirements of subdivision (b) of this note and all other applicable requirements.
 - (ii) Originating materials used in production of goods of a USMCA country.—Originating materials from the territory of one or more USMCA countries that are used in the production of a good in the territory of another USMCA country shall be considered to originate in the territory of such other USMCA country.
 - (iii) Production undertaken on nonoriginating materials used in the production of goods.—In determining whether a good is an originating good under this note, production undertaken on nonoriginating material in the territory of one or more USMCA countries by one or more producers may contribute to the originating status of the good, regardless of whether that production is sufficient to confer originating status to the nonoriginating material.
- (e) De minimis amounts of nonoriginating materials.
- (i) In general.—Except as provided in subparagraphs (e)(ii) through (iv) below, a good that does not undergo a change in tariff classification or satisfy a regional value content requirement set forth in subdivision (o) of this note is an originating good if—
 - (A) the value of all nonoriginating materials that are used in the production of the good, and do not undergo the applicable change in tariff classification set forth in subdivision (o) of this note—
 - (1) does not exceed 10 percent of the transaction value of the good, adjusted to exclude any costs incurred in the international shipment of the good; or
 - (2) does not exceed 10 percent of the total cost of the good;
 - (B) the good meets all other applicable requirements of this note; and
 - (C) the value of such nonoriginating materials is included in the value of nonoriginating materials for any applicable regional value content requirement for the good.
 - (ii) Exceptions for dairy and other products.—Subdivision (e)(i) does not apply to the following:
 - (A) a nonoriginating material of headings 0401 through 0406, or a nonoriginating dairy preparation containing over 10 percent by dry weight of milk solids of subheading 1901.90 or 2106.90, used or consumed in the production of a good of headings 0401 through 0406;
 - (B) a nonoriginating material of headings 0401 through 0406, or nonoriginating dairy preparations containing over 10 percent by dry weight of milk solids of subheading 1901.90 or 2106.90, used or consumed in the production of any of the following goods:
 - (1) infant preparations containing over 10 percent by dry weight of milk solids, of subheading 1901.10;

- (2) mixes and doughs containing over 25 percent by dry weight of butterfat, not put up for retail sale, of subheading 1901.20;
 - (3) a dairy preparations containing over 10 percent by dry weight of milk solids, of subheading 1901.90 or 2106.90;
 - (4) a good of heading 2105;
 - (5) beverages containing milk of subheading 2202.90;
 - (6) animal feeds containing over 10 percent by dry weight of milk solids of subheading 2309.90.
- (C) A nonoriginating material or heading 0805, or any of subheadings 2009.11 through 2009.39, used or consumed in the production of a good of subheadings 2009.11 through 2009.39, or a fruit or vegetable juice of any single fruit or vegetable, fortified with minerals or vitamins, concentrated or unconcentrated, of subheading 2106.90 or 2202.90.
- (D) A nonoriginating material of chapter 9 used or consumed in the production of instant coffee, not flavored, of subheading 2101.11.
- (E) A nonoriginating material of chapter 15 used or consumed in the production of a good of heading 1501 through 1508, 1512, 1514 or 1515.
- (F) A nonoriginating material of heading 1701 used or consumed in the production of a good of any of headings 1701 through 1703.
- (G) A nonoriginating good of chapter 17 or heading 1805 used in the production of a good of subheading 1806.10.
- (H) Nonoriginating peaches, pears, or apricots of chapter 8 or 20, used in the production of a good of heading 2008.
- (I) A nonoriginating single juice ingredient of heading 2009 used or consumed in the production of a good of—
- (1) subheading 2009.90, or tariff item 2106.90.54 (concentrated mixtures of fruit or vegetable juice, fortified with minerals or vitamins); or
 - (2) tariff items 2202.99.37 (mixtures of fruit or vegetable juices, fortified with minerals or vitamins).
- (J) A nonoriginating material of any of headings 2203 through 2208 used or consumed in the production of a good provided for under heading 2207 or 2208.
- (iii) Goods provided for under chapters 1 through 27.—Subparagraph (i) of this subdivision does not apply to a nonoriginating material used or consumed in the production of a good provided for in chapters 1 through 27 unless the nonoriginating material is provided for in a different subheading than the subheading of the good for which origin is being determined.
- (iv) Textile or apparel goods.
- (A) Goods classified under chapters 50 through 60.—Except as provided in subparagraph (C) below, a textile or apparel good provided for in any of chapters 50 through 60 or heading 9619 that is not an originating good because certain nonoriginating materials used in the production of the good do not undergo an applicable change in tariff classification set forth in subdivision (o) of this note, shall be considered to be an originating good if the total weight of all such materials, including elastomeric yarns, is not more than 10 percent of the total weight of the good and the good meets all other applicable requirements of this note.
 - (B) Goods classified under chapters 61 through 63.—Except as provided in subparagraph (C) below, a textile or apparel good provided for in chapter 61, 62 or 63 that is not an originating good because certain fibers or yarns used in the production of the component of the good that determines the tariff classification of the good do not undergo an applicable change in tariff classification set forth in subdivision (o) of this note shall be considered to be an originating good if the total weight of all such fibers or yarns in the component, including elastomeric yarns, is not more than 10 percent of the total weight of the component and the good meets all other applicable requirements of this note.

- (C) Goods containing nonoriginating elastomeric yarns.
- (1) Goods classified under chapters 50 through 60 or heading 9619.—A textile or apparel good described in subparagraph (A) above and containing nonoriginating elastomeric yarns shall be considered to be an originating good only if the nonoriginating elastomeric yarns contained in the good do not exceed 7 percent of the total weight of the good.
 - (2) Goods classified under chapters 61 through 63.—A textile or apparel good described in subparagraph (B) shall be considered to be an originating good only if the nonoriginating elastomeric yarns contained in the component of the good that determines the tariff classification of the good do not exceed 7 percent of the total weight of the component.
- (f) Fungible goods and materials.
- (i) Fungible materials used in production.—Subject to subparagraph (f)(iii) below, if originating and nonoriginating fungible materials are used or consumed in the production of a good, the determination of whether the materials are originating may be made on the basis of any of the inventory management methods set forth in regulations implementing this note.
 - (ii) Fungible goods commingled and exported.—Subject to subparagraph (f)(iii) below, if originating and nonoriginating fungible goods are commingled and exported in the same form, the determination of whether the goods are originating may be made on the basis of any of the inventory management methods set forth in regulations implementing this note. An importer may claim that a fungible material or good is originating if the importer, producer, or exporter has physically segregated each fungible material or good as to allow their specific identification.
 - (iii) Use of inventory management method.—A person that selects an inventory management method for purposes of paragraph (f)(i) or (f)(ii) of this subdivision shall use that inventory management method throughout the fiscal year of the person.
- (g) Accessories, spare parts, tools and instructional or other information materials.
- (i) In general.—Subject to paragraph (g)(ii) below, accessories, spare parts, tools or instructional or other information materials delivered with a good shall—
 - (A) be treated as originating if the good is an originating good;
 - (B) be disregarded in determining whether a good is a good wholly obtained or produced entirely in the territory of one or more USMCA countries or satisfies a process or change in tariff classification set forth in subdivision (o) of this note; and
 - (C) be taken into account as originating or nonoriginating materials, as the case may be, in calculating any applicable regional value content of the good set forth in subdivision (o) of this note.
 - (ii) Conditions.—Paragraph (g)(i) of this subdivision shall apply only if—
 - (A) the accessories, spare parts, tools or instructional or other information materials are classified with and delivered with, but not invoiced separately from, the good; and
 - (B) the types, quantities and value of the accessories, spare parts, tools or instructional or other information materials are customary for the good.
- (h) [Format adjusted for alignment.]
- (i) Packing materials and containers for shipment.—Packing materials and containers for shipment shall be disregarded in determining whether a good is an originating good.
 - (ii) Packaging materials and containers for retail sale.—Packaging materials and containers in which a good is packaged for retail sale, if classified with the good, shall be disregarded in determining whether all of the nonoriginating materials used in the production of the good undergo the applicable process or change in tariff classification requirement set forth in subdivision (o) of this note, or whether the good is a good wholly obtained or produced entirely in the territory of one or more USMCA countries. If the good is subject to a regional value content requirement set forth in that Annex, the value of such packaging materials and containers shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.

- (iii) Indirect materials.—An indirect material shall be treated as an originating material without regard to where it is produced.
- (iv) Transit and transshipment.—A good that has undergone production necessary to qualify as an originating good under subdivision (b) of this note shall not be considered to be an originating good if, subsequent to that production, the good—
 - (A) undergoes further production or any other operation outside the territory of a USMCA country, other than—
 - (1) unloading, reloading, separation from a bulk shipment, storing, labeling or marking, as required by a USMCA country, or
 - (2) any other operation necessary to preserve the good in good condition or to transport the good to the territory of the importing USMCA country; or
 - (B) does not remain under the control of customs authorities in a country other than a USMCA country.
- (i) Goods classifiable as goods put up in sets.— Notwithstanding the rules set forth in subdivision (o) of this note, goods classifiable as goods put up in sets for retail sale as provided for in rule 3 of the general rules of interpretation of the tariff schedule shall not be considered to be originating goods unless—
 - (A) each of the goods in the set is an originating good; or
 - (B) the total value of the nonoriginating goods in the set does not exceed 10 percent of the value of the set. [**Compiler's note: numbering of subdivisions as set forth in proclaimed text.**]
- (j) Nonqualifying operations.—A good shall not be considered to be an originating good merely by reason of—
 - (i) mere dilution with water or another substance that does not materially alter the characteristics of the good; or
 - (ii) any production or pricing practice with respect to which it may be demonstrated, by a preponderance of the evidence, that the object of the practice was to circumvent the requirements of this note.
- (k) Special rules for automotive goods.
 - (i) An automotive good and other motor vehicles and parts described herein shall be subject to applicable requirements set forth in this paragraph, including, with respect to a passenger vehicle or light truck that has been authorized to use the alternative staging regime described under subparagraph (viii), applicable requirements for the duration of the alternative staging period specified in the approval.
 - (ii) Definitions.—In this subdivision:
 - (A) Advanced technology vehicle.—The term “advanced technology vehicle” means:
 - (1) an electric vehicle, including a hybrid electric vehicle, a fuel cell vehicle or other type of advanced propulsion vehicle (e.g., zero emission vehicle); or
 - (2) an autonomous vehicle of headings 8703 or 8704 classified as a Level 4 or Level 5 automated vehicle in accordance with SAE International SAEJ3016-2016 (Taxonomy and Definitions for Terms Related to Driving Automation Systems for On-Road Motor Vehicles), as amended;
 - (B) Alternative staging regime.—The term “alternative staging regime” means the application, pursuant to subdivision (k)(viii) of this note, of the requirements of article 8 of the automotive appendix to the production of covered vehicles to allow producers of such vehicles to bring such production into compliance with the requirements of Article 2 through 7, inclusive, of that appendix, under the terms provided in applicable regulations.
 - (C) Alternative staging regime period.—The term “alternative staging regime period” means the period during which the alternative staging regime is in effect.

- (D) Automotive appendix.—The term “automotive appendix” means the Appendix to Annex 4-B of the USMCA (relating to the product-specific rules of origin for automotive goods, as reflected in subdivision (o) of this note).
- (E) Automotive good.—The term “automotive good” means—
- (1) a covered vehicle; or
 - (2) a part, component or material listed in table A.1, A.2, B, C, D or E of the automotive appendix, subject to any provisions that may be included in regulations issued by the Secretary of the Treasury.
- (F) Automotive rules of origin.—The term “automotive rules of origin” means the rules of origin for automotive goods set forth in the automotive appendix.
- (G) Class of motor vehicles.—The term “class of motor vehicles” means one of the following categories of motor vehicles:
- (1) motor vehicles of subheading 8701.20, motor vehicles for the transport of 16 or more persons of subheadings 8702.10 or 8702.90, or motor vehicles of subheadings 8704.10, 8704.22, 8704.23, 8704.32 or 8704.90, or headings 8705 or 8706;
 - (2) motor vehicles of subheadings 8701.10 or 8701.30 through 8701.90;
 - (3) motor vehicles for the transport of 15 or fewer persons of subheading 8702.10 or 8702.90, or motor vehicles of subheadings 8704.21 or 8704.31; or
 - (4) motor vehicles of subheadings 8703.21 through 8703.90.
- (H) Commissioner.—The term “Commissioner” means the Commissioner of U.S. Customs and Border Protection.
- (I) Covered vehicle.—The term “covered vehicle” means a passenger vehicle, light truck or heavy truck.
- (J) Interagency committee.—The term “interagency committee” means the interagency committee established under section 202A(b)(1) of the USMCA Implementation Act.
- (K) Model line.—The term “model line” means a group of motor vehicles having the same platform or model name.
- (L) Motor vehicle assembler.—The term “motor vehicle assembler” means a producer of motor vehicles and any related persons or joint ventures in which the producer participates.
- (M) New building.—The term “new building” means a new construction, including at least the pouring or construction of new foundation and floor, the erection of a new structure and roof, and installation of new plumbing, electrical and other utilities to house a complete vehicle assembly process.
- (N) Passenger vehicle; light truck; heavy truck.—For purposes of this note, the term “passenger vehicle”, “light truck” and “heavy truck” have the meanings given those terms herein. For purposes of this note, the term “off-road use” refers to vehicle that does not meet U.S. federal safety and emissions standards permitting unrestricted on-road use, or the equivalent Mexican and Canadian on-road standards.
- (1) Passenger vehicle.—The term “passenger vehicle” means a vehicle of subheading 8703.21 through 8703.90, except for:
 - (I) a vehicle with a compression-ignition engine classified in subheadings 8703.31 through 8703.33 or a vehicle of subheading 8703.90 with both a compression-ignition engine and an electric motor for propulsion;
 - (II) a three or four-wheeled motorcycle;
 - (III) an all-terrain vehicle, meaning a vehicle that does not meet U.S. federal safety and emissions standards permitting unrestricted on-road use or the equivalent Mexican and Canadian on-road standards; or

- (IV) a motorhome or entertainer coach, meaning a vehicle built on a self-propelled motor vehicle chassis that is solely or principally designed as temporary living quarters for recreational, camping, entertainment, corporate or seasonal use.
 - (2) Light truck.—The term “light truck” means a vehicle of subheading 8704.21 or 8704.31, except for a vehicle that is solely or principally for off-road use.
 - (3) Heavy truck.—The term “heavy truck” means a vehicle of subheading 8701.20, 8704.22, 8704.23, 8704.32, 8704.90 or 8706, except for a vehicle that is solely or principally for off-road use. For purposes of this note, a “good of heading 8706” means a chassis fitted with engines for a vehicle under subheading 8701.20, 8704.22, 8704.23, 8704.32 or 8704.90, except for a vehicle that is solely or principally designed for off-road use.
 - (O) Refit.—The term “refit” means a plant closure, for purposes of plant conversion or retooling, that lasts at least three months.
 - (P) Super-core.—The term “super-core” means the parts listed in the left column of Table A.2 of the automotive appendix, which are considered as a single part for the purposes of performing a regional value content calculation in accordance with the provisions of this note and of article 5.2 of the USMCA automotive appendix concerning averaging.
- (iii) Staging of regional value content requirements.---
- (A) Notwithstanding subdivision (o) of this note, the regional value content requirement for a passenger vehicle or a light truck is:
 - (1) 66 percent under the net cost method, beginning on July 1, 2020;
 - (2) 69 percent under the net cost method, beginning on July 1, 2021;
 - (3) 72 percent under the net cost method, beginning on July 1, 2022; and
 - (4) 75 percent under the net cost method, beginning on July 1, 2023, and thereafter.
 - (B) Notwithstanding subdivision (o) of this note, the regional value content requirement for a part listed in Table A.1 of the automotive appendix that is for use in a passenger vehicle or light truck is:
 - (1) 66 percent under the net cost method or 76 percent under the transaction value method, if the corresponding rule in subdivision (o) includes a transaction value method, beginning on July 1, 2020;
 - (2) 69 percent under the net cost method or 79 percent under the transaction value method, if the corresponding rule in subdivision (o) includes a transaction value method, beginning on July 1, 2021;
 - (3) 72 percent under the net cost method or 82 percent under the transaction value method, if the corresponding rule in subdivision (o) includes a transaction value method, beginning on July 1, 2022; or
 - (4) 75 percent under the net cost method or 85 percent under the transaction value method, if the corresponding rule in subdivision (o) includes a transaction value method, beginning on July 1, 2023, and thereafter.
 - (C) Notwithstanding subdivision (o) of this note, a part listed in Table A.1 of the automotive appendix that is for use in a passenger vehicle or light truck is originating only if it satisfies the regional value content requirement in subdivision (k)(iii)(B), except for batteries of subheading 8507.60 that are used as the primary source of electrical power for the propulsion of an electric passenger vehicle or light truck.
 - (D) Notwithstanding subdivision (o) of this note, the regional value content requirement for a part listed in Table B of the automotive appendix that is for use in a passenger vehicle or light truck is:
 - (1) 62.5 percent under the net cost method or 72.5 percent under the transaction value method, if the corresponding rule in subdivision (o) includes a transaction value method, beginning on July 1, 2020;

- (2) 65 percent under the net cost method or 75 percent under the transaction value method, if the corresponding rule in subdivision (o) includes a transaction value method, beginning on July 1, 2021;
- (3) 67.5 percent under the net cost method or 77.5 percent under the transaction value method, if the corresponding rule in subdivision (o) includes a transaction value method, beginning on January 1, 2022; or
- (4) 70 percent under the net cost method or 80 percent under the transaction value method, if the corresponding rule in subdivision (o) includes a transaction value method, beginning on January 1, 2023, and thereafter.

Notwithstanding any regional value content requirement in this subparagraph, a part listed in Table B of the automotive appendix is originating if it meets the applicable change in tariff classification requirement provided in subdivision (o) of this note.

- (E) Notwithstanding subdivision (o) of this note, the regional value content requirement for a part listed in Table C of the automotive appendix that is for use in a passenger vehicle or light truck is:
- (1) 62 percent under the net cost method or 72 percent under the transaction value method, if the corresponding rule in subdivision (o) includes a transaction value method, beginning on July 1, 2020;
 - (2) 63 percent under the net cost method or 73 percent under the transaction value method, if the corresponding rule in subdivision (o) includes a transaction value method, beginning on July 1, 2021;
 - (3) 64 percent under the net cost method or 74 percent under the transaction value method, if the corresponding rule in subdivision (o) includes a transaction value method, beginning on July 1, 2022; or
 - (4) 65 percent under the net cost method or 75 percent under the transaction value method, if the corresponding rule in subdivision (o) includes a transaction value method, beginning on July 1, 2023, and thereafter.

Notwithstanding any regional value content requirement in this subparagraph, a part listed in Table C of the automotive appendix is originating if it meets the applicable change in tariff classification requirement provided in subdivision (o) of this note.

- (F) For the purposes of calculating the regional value content under paragraphs (A) through (E) of this subdivision, the provisions of subdivision (c)(i) (regional value content), (c)(viii) (value of materials used in production), (c)(x) (further adjustments to the value of materials) and (c)(ix) (intermediate materials) and subdivision (N) on averaging apply.
- (G) For the purposes of this note, a passenger vehicle or light truck is originating only if the parts listed in column 1 of Table A.2 of the automotive appendix, as may be further described in applicable regulations, including provisions of the Uniform Regulations, used in the production of a passenger vehicle or light truck are originating. Such a part is originating only if it satisfies the regional value content requirement in subdivision (B), except for an advanced battery.
- (H) For the purposes of calculating the regional value content under subdivision (c)(i) of this note, for a part under column 1 of Table A.2 of the automotive appendix, the value of nonoriginating materials (VNM) is, at the vehicle producer's option:
- (1) the value of all non-originating materials used in the production of the part; or
 - (2) the value of any non-originating components used in the production of the part that are listed under Column 2 of Table A.2 of such appendix.
- (I) Further to subparagraph (H) above, the regional value content may also be calculated, at the producer's option, for all parts under column 1 of Table A.2 of the automotive appendix as a single part, using the sum of the net cost of each part listed under Column 1 of Table A.2 of such appendix, and when calculating the VNM, at the producer's option:
- (1) the sum of the value of all non-originating materials used in the production of the parts listed under Column 1; or
 - (2) the sum of the value of only those non-originating components under Column 2 of Table A.2 of the automotive appendix, used in the production of the parts listed under Column 1 of such table.

If this regional value content meets the required threshold under subparagraph (I)(2), all parts under Table A.2 of such appendix are originating and the passenger vehicle or light truck will be considered to have met the requirement under subparagraph (H), above.

- (J) Notwithstanding any other provision of this note, the regional value content requirement for a heavy truck is:
- (1) 60 percent under the net cost method, beginning on July 1, 2020;
 - (2) 64 percent under the net cost method, beginning on July 1, 2024; or
 - (3) 70 percent under the net cost method, beginning on July 1, 2027, and thereafter.
- (K) Notwithstanding any other provision of this note, the regional value content requirement for a part listed in Table D of the automotive appendix that is for use in a heavy truck is:
- (1) 60 percent under the net cost method or 70 percent under the transaction value method, if the corresponding rule in subdivision (o) of this note includes a transaction value method, beginning on July 1, 2020;
 - (2) 64 percent under the net cost method or 74 percent under the transaction value method, if the corresponding rule in subdivision (o) of this note includes a transaction value method, beginning on July 1, 2024; and
 - (3) 70 percent under the net cost method or 80 percent under the transaction value method, if the corresponding rule in subdivision (o) of this note includes a transaction value method, beginning on July 1, 2027, and thereafter.
- (L) Notwithstanding subdivision (o) of this note, the regional value content requirement for a part listed in Table E of the automotive appendix that is for use in a heavy truck is:
- (1) 50 percent under the net cost method or 60 percent under the transaction value method, if the corresponding rule in subdivision (o) includes a transaction value method, beginning on July 1, 2020;
 - (2) 54 percent under the net cost method or 64 percent under the transaction value method, if the corresponding rule in subdivision (o) includes a transaction value method beginning on July 1, 2024; and
 - (3) 60 percent under the net cost method or 70 percent under the transaction value method, if the corresponding rule in subdivision (o) includes a transaction value method, beginning on July 1, 2027, and thereafter.
- (M) Notwithstanding any other provision of this note, a part of heading 8407 or 8408 or subheading 8708.40, or a chassis classified in subheading 8708.99, that is for use in a heavy truck, is originating only if it satisfies the applicable regional value content requirement in subdivision (B) above.
- (iv) Averaging.—
- (A) For the purposes of calculating the regional value content of a passenger vehicle, light truck or heavy truck, the calculation may be averaged over the producer's fiscal year, using any one of the following categories, on the basis of either all motor vehicles in the category or only those motor vehicles in the category that are exported to the territory of one or more of the other USMCA countries:
- (1) the same model line of motor vehicles in the same class of vehicles produced in the same plant in the territory of a USMCA country;
 - (2) the same class of motor vehicles produced in the same plant in the territory of a USMCA country;
 - (3) the same model line or same class of motor vehicles produced in the territory of a USMCA country; or
 - (4) any other category as the USMCA countries may decide and provide for in the Uniform Regulations or other appropriate instrument.

(B) For the purposes of calculating the regional value content for an automotive good listed in Tables A.1, B, C, D or E of the automotive appendix, produced in the same plant, or a super-core for a passenger vehicle or light truck, the calculation may be averaged:

- (1) over the fiscal year of the motor vehicle producer to whom the good is sold;
- (2) over any quarter or month;
- (3) over the fiscal year of the producer of the automotive material; or
- (4) over any of the categories in subdivision (A)(1) through (A)(4) above,

provided that the good was produced during the fiscal year, quarter, or month forming the basis for the calculation, in which:

- (I) the average in subparagraph (A) is calculated separately for those goods sold to one or more motor vehicle producers, or
- (II) the average in subparagraph (A) or (B) is calculated separately for those goods that are exported to the territory of another USMCA country.

(v) Steel and aluminum rules.

(A) In addition to the provisions of subdivisions (c) and (o) of this note and other requirements in the automotive appendix, a passenger vehicle, light truck, or heavy truck is originating only if, during a time period provided for in subdivision (v)(B) below, at least 70 percent of:

- (1) the vehicle producer's purchases of steel by value in the territories of the USMCA countries; and
- (2) the vehicle producer's purchases of aluminum by value in the territories of the USMCA countries,

are of originating goods.

The requirement in this paragraph applies to a vehicle producer's corporate purchases throughout the territories of the USMCA countries, including if the producer has more than one location in a USMCA country where steel and aluminum is purchased. Such purchases of steel and aluminum include direct purchases, purchases through a services center, and purchases contracted through a supplier. Notwithstanding any other provision of this note, beginning on July 1, 2027, for steel to be considered as originating under this note, all steel manufacturing processes must occur in one or more of the USMCA countries, except for metallurgical processes involving the refinement of steel additives. Such processes include the initial melting and mixing and continues through the coating stage. This requirement does not apply to raw materials used in the steel manufacturing process, including steel scrap; iron ore; pig iron; reduced, processed or pelletized iron ore; or raw alloys.

(B) For the purposes of determining the vehicle producer's purchases of steel or aluminum in paragraph (v)(A) above, the producer may calculate the purchases:

- (1) over the previous fiscal year of the producer;
- (2) over the previous calendar year;
- (3) over the quarter or month to date in which the vehicle is exported;
- (4) over the producer's fiscal year to date in which the vehicle is exported; or
- (5) over the calendar year to date in which the vehicle is exported.

(C) A steel or aluminum calculation based on the producer's previous fiscal year is valid for the duration of the producer's current fiscal year.

A steel or aluminum calculation based on the previous calendar year is valid for the duration of the current calendar year.

- (D) Regulations, including provisions of the Uniform Regulations, may provide additional descriptions for steel and aluminum subject to paragraph (v)(A) above, such as by tariff provisions or product descriptions, to facilitate implementation of this requirement.

(vi) Labor value content.

- (A) In addition to the provisions of subdivision (o) and any other applicable provision of this note, and subject to regulations issued by the Secretary of the Treasury, in consultation with the Secretary of Labor, a passenger vehicle is originating only if the vehicle producer certifies that its production meets a Labor Value Content (LVC) requirement of:
- (1) 30 percent, consisting of at least 15 percentage points of high-wage material and manufacturing expenditures, no more than 10 percentage points of high-wage technology expenditures and no more than 5 percentage points of high-wage assembly expenditures, beginning on July 1, 2020;
 - (2) 33 percent, consisting of at least 18 percentage points of high-wage material and manufacturing expenditures, no more than 10 percentage points of technology expenditures, and no more than 5 percentage points of high-wage assembly expenditures, beginning on July 1, 2021;
 - (3) 36 percent, consisting of at least 21 percentage points of high-wage material and manufacturing expenditures, no more than 10 percentage points of technology expenditures, and no more than 5 percentage points of high-wage assembly expenditures, beginning on July 1, 2022; or
 - (4) 40 percent, consisting of at least 25 percentage points of high-wage material and manufacturing expenditures, no more than 10 percentage points of technology expenditures, and no more than 5 percentage points of high-wage assembly expenditures, beginning on July 1, 2023, and thereafter.
- (B) In addition to the provisions of subdivision (o) and any other requirement in this note, a light truck or heavy truck is originating only if the vehicle producer certifies that its production meets an LVC requirement of 45 percent, consisting of at least 30 percentage points of high-wage material and manufacturing expenditures, no more than 10 percentage points of high-wage technology expenditures and no more than 5 percentage points of high-wage assembly expenditures.
- (C) High-wage material or manufacturing expenditures, high-wage technology expenditures and high-wage assembly expenditures described under paragraphs (vi)(A) and (v)(B) above are calculated as follows:
- (1) for high-wage material and manufacturing expenditures, the Annual Purchase Value (APV) of purchased parts or materials produced in a plant or facility, and, if the producer elects, any labor costs in the vehicle assembly plant or facility, that is located in North America with a production wage rate that is at least US\$16/hour as a percentage of the net cost of the vehicle, or the total vehicle plant assembly APV, including, if the producer elects, any labor costs in the vehicle assembly plant or facility;
 - (2) for high-wage technology expenditures, the annual vehicle producer expenditures in North America on wages for research and development (R&D) or information technology (IT) as a percentage of total annual vehicle producer expenditures on production wages in North America; and
 - (3) for high-wage assembly expenditures, a single credit of no more than 5 percentage points if the vehicle producer demonstrates that it has an engine assembly, transmission assembly, or an advanced battery assembly plant, or has long term contracts with such a plant, located in North America with an average production wage of at least US\$16 per hour.

The production wage rate is the average hourly base wage rate, not including benefits, of employees directly involved in the production of the part or component used to calculate the LVC, and does not include salaries of management, R&D, engineering or other workers who are not involved in the direct production of the parts or in the operation of production lines.

High wage material and manufacturing expenses may also be calculated by taking the Annual Purchase Value of purchased parts of materials produced in a plant or facility located in the territories of the USMCA countries with a production wage

rate that is at least US\$16/hour as a percentage of total vehicle plant assembly APV, pursuant to applicable provisions of regulations, including provisions of the Uniform Regulations.

R&D expenditures include expenditures on research and development including prototype development, design, engineering, testing, or certifying operations. IT expenditures include expenditures on software development, technology integration, vehicle communications and information technology support operations.

In the case of a passenger vehicle or light truck, in order to receive the credit described in subparagraph (3), a high wage engine assembly or transmission assembly plant must have a production capacity of at least 100,000 originating engines or transmissions and an advanced battery assembly plant must have a production capacity of at least 25,000 originating assembled advanced battery packs. In the case of a heavy truck, a high-wage engine, transmission or battery assembly plant must have a production capacity of at least 20,000 originating engines, transmissions or assembled advanced battery packs to receive the credit. Engines, transmissions or advanced battery packs need not separately qualify as originating in order to meet this requirement.

- (D) Passenger vehicles.--For the purposes of calculating the LVC of a passenger vehicle, light truck or heavy truck, the calculation may be averaged using any one of the following categories, on the basis of either all motor vehicles in the category or only those vehicles in the category that are exported to the territory of one or more of the other USMCA countries:
- (1) the same model line of motor vehicles in the same class of vehicles produced in the same plant in the territory of a USMCA country;
 - (2) the same class of motor vehicles produced in the same plant in the territory of a USMCA country;
 - (3) the same model line of motor vehicles or same class of motor vehicles produced in the territory of a USMCA country;
or
 - (4) any other category as the USMCA countries may decide.
- (E) For the purposes of determining the LVC in paragraphs (A) or (B) above including under any alternative staging regime described in paragraph (viii) that may be implemented, the producer may calculate the LVC over one of the following periods:
- (1) the previous fiscal year of the producer;
 - (2) the previous calendar year;
 - (3) the quarter or month to date in which the vehicle is produced or exported;
 - (4) the producer's fiscal year to date in which the vehicle is produced or exported; or
 - (5) the calendar year to date in which the vehicle is produced or exported.
- An LVC calculation based on the producer's previous fiscal year is valid for the duration of the producer's current fiscal year.
- An LVC calculation based on the previous calendar year is valid for the duration of the current calendar year.
- (F) For the period ending July 1, 2027, if a vehicle producer certifies an LVC for a heavy truck that is higher than 45 percent by increasing the amount of high wage material and manufacturing expenditures above 30 percentage points, the producer may use the points above 30 percentage points as a credit towards the regional value content percentages under this note, provided that the regional value content percentage is not below 60 percent.
- (vii) Certification and verification with respect to any provision of this note or of the automotive appendix, including the steel and aluminum requirements described in (v) and the labor value content requirements described in (vi), is subject to applicable regulations, including the Uniform Regulations.
- (viii) Alternative staging regime.

- (A) As may be further provided for in subchapter XXIII of chapter 99 of the tariff schedule, a passenger vehicle or light truck may be originating pursuant to an alternative staging regime, provided that use of the alternative staging regime has been authorized by the Office of the U.S. Trade Representative, during the period that such regime is in effect. An alternative staging regime for eligible passenger vehicles or light trucks must meet the requirements of applicable regulations, including provisions of the Uniform Regulations, and is subject to the terms of the plan as authorized by the Office of the U.S. Trade Representative.
- (B) For purposes of this subparagraph, a vehicle is not eligible for preferential tariff treatment under an alternative staging regime if the Office of the United States Trade Representative (USTR)—
 - (1) has determined that the producer of that vehicle will not be able to meet applicable requirements after the alternative staging regime has expired; or
 - (2) has determined that the producer of that vehicle has failed to take the steps set forth in its request for an alternative staging regime and will not be able to meet applicable requirements after the alternative staging regime has expired as a result of such failure, has provided false or misleading information in its request, or has failed to notify the USTR of material changes in circumstances that will prevent it from meeting applicable requirements after the alternative staging regime has expired.
- (ix) RVC for other motor vehicles.
 - (A) Notwithstanding the provisions of subdivision (o) of this note, the regional value content requirement is 62.5 percent under the net cost method for:
 - (1) a motor vehicle for the transport of 15 or fewer persons of subheading 8702.10 or 8702.90; a passenger vehicle with a compression-ignition engine as the primary motor of propulsion of subheading 8703.21 through 8703.90, a three or four-wheeled motorcycle of subheading 8703.21 through 8703.90, a motorhome or entertainer coach of [subheading] 8703.21 through 8703.90, an ambulance, hearse, or prison van of subheading 8703.21 through 8703.90, a vehicle solely or principally for off-road use of subheading 8703.21 through 8703.90; or a vehicle of subheading 8704.21 or 8704.31 that is solely or principally for off-road use; and
 - (2) a good of heading 8407 or 8408, or subheading 8708.40, that is for use in a motor vehicle in subparagraph (1) above.
 - (B) Notwithstanding the provisions of subdivision (o) of this note, the regional value content requirement is 60 percent under the net cost method for:
 - (1) a good that is a motor vehicle of heading 8701, except for subheading 8701.20; a motor vehicle for the transport of 16 or more persons of subheading 8702.10 or 8702.90; a motor vehicle of subheading 8704.10; a motor vehicle of subheading 8704.22, 8704.23, 8704.32 or 8704.90 that is solely or principally for off-road use; a motor vehicle of heading 8705; or a good of heading 8706 that is not for use in a passenger vehicle, light truck or heavy truck;
 - (2) a good of heading 8407 or 8408, or subheading 8708.40, that is for use in a motor vehicle in subparagraph (1) above; or
 - (3) except for a good in paragraph (2) above or of subheading 8482.10 through 8482.80, 8483.20 or 8483.30, a good in Table F of the automotive appendix that is subject to a regional value content requirement and that is for use in a motor vehicle in subparagraph (1) or (2) above.
 - (C) For the purposes of calculating the regional value content under the net cost method for a good that is a motor vehicle provided for in paragraph (A) or (B) above, a good listed in Table F of the automotive appendix for use as original equipment in the production of a good in paragraph (A)(1), or a component listed in Table G of such appendix for use as original equipment in the production of the motor vehicle in paragraph (B)(1) above, the value of non-originating materials used by the producer in the production of the good shall be the sum of:
 - (1) for each material used by the producer listed in Table F or Table G of such appendix, whether or not produced by the producer, at the choice of the producer and determined in accordance with applicable provisions of this note on regional value content, either

- (I) the value of such material that is non-originating, or
 - (II) the value of non-originating materials used in the production of such material; and
- (2) the value of any other non-originating material used by the producer that is not listed in Table F or Table G of the automotive appendix, determined in accordance with applicable provisions of this note on regional value content.
- (D) For purposes of calculating the regional value content of a motor vehicle covered by paragraph (A) or (B) above, the producer may average its calculation over its fiscal year, using any one of the following categories, on the basis of either all motor vehicles in the category or only those motor vehicles in the category that are exported to the territory of one or more of the other USMCA countries:
- (1) the same model line of motor vehicles in the same class of vehicles produced in the same plant in the territory of a USMCA country;
 - (2) the same class of motor vehicles produced in the same plant in the territory of a USMCA country; or
 - (3) the same model line of motor vehicles produced in the territory of a USMCA country.
- (E) For purposes of calculating the regional value content for a good listed in Table F of the automotive appendix, or a component or material listed in Table G of such appendix, produced in the same plant, the producer of the good may:
- (1) average its calculation:
 - (I) over the fiscal year of the motor vehicle producer to whom the good is sold,
 - (II) over any quarter or month, or
 - (III) over its fiscal year, if the good is sold as an aftermarket part;
 - (2) calculate the average referred to in subparagraph (1) separately for a good sold to one or more motor vehicle producers; or
 - (3) with respect to any calculation under this paragraph, calculate the average separately for goods that are exported to the territory of one or more of the USMCA countries.
- (F) The regional value content requirement for a motor vehicle identified in paragraph (A) or (B) above shall be:
- (1) 50 percent for five years after the date on which the first motor vehicle prototype is produced in a plant by a motor vehicle assembler, if:
 - (I) it is a motor vehicle of a class, or marque, or, except for a motor vehicle identified in paragraph (B) above, size category and underbody, not previously produced by the motor vehicle assembler in the territory of any of the USMCA countries,
 - (II) the plant consists of a new building in which the motor vehicle is assembled, and
 - (III) the plant contains substantially all new machinery that is used in the assembly of the motor vehicle; or
 - (2) 50 percent for two years after the date on which the first motor vehicle prototype is produced at a plant following a refit, if it is a different motor vehicle of a class, or marque, or, except for a motor vehicle identified in paragraph (B), size category and underbody, than was assembled by the motor vehicle assembler in the plant before the refit.
- (I) Definitions. In this note:
- (i) Aquaculture.—The term “aquaculture” means the farming of aquatic organisms, including fish, molluscs, crustaceans, other aquatic invertebrates and aquatic plants from seed stock such as eggs, fry, fingerlings or larvae, by intervention in the rearing or growth processes to enhance production such as regular stocking, feeding or protection from predators.

- (ii) Customs Valuation Agreement.—The term “Customs Valuation Agreement” means the Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade 1994 referred to in section 101(d)(8) of the Uruguay Round Agreements Act (19 U.S.C. 3511(d)(8)).
- (iii) Fungible good or fungible material.—The term “fungible good” or “fungible material” means a good or material, as the case may be, that is interchangeable with another good or material for commercial purposes and the properties of which are essentially identical to such other good or material.
- (iv) Good wholly obtained or produced entirely in the territory of one or more USMCA countries.—The term “good wholly obtained or produced entirely in the territory of one or more USMCA countries” means any of the following:
 - (1) a mineral good or other naturally occurring substance extracted or taken from the territory of one or more USMCA countries;
 - (2) a plant, plant good, vegetable or fungus grown, cultivated, harvested, picked or gathered in the territory of one or more USMCA countries;
 - (3) a live animal born and raised in the territory of one or more USMCA countries;
 - (4) a good obtained in the territory of one or more USMCA countries from a live animal;
 - (5) an animal obtained by hunting, trapping, fishing, gathering or capturing in the territory of one or more USMCA countries;
 - (6) a good obtained in the territory of one or more USMCA countries from aquaculture;
 - (7) a fish, shellfish or other marine life taken from the sea, seabed or subsoil outside the territory of one or more USMCA countries and outside the territorial sea of any country that is not a USMCA country by—
 - (A) a vessel that is registered or recorded with a USMCA country and flying the flag of that country; or
 - (B) a vessel that is documented under the laws of the United States;
 - (8) a good produced on board a factory ship from goods referred to in subparagraph (7) above, if such factory ship—
 - (A) is registered or recorded with a USMCA country and flies the flag of that country; or
 - (B) is a vessel that is documented under the laws of the United States;
 - (9) a good, other than a good referred to in subparagraph (7) above, that is taken by a USMCA country, or a person of a USMCA country, from the seabed or subsoil outside the territory of a USMCA country, if that USMCA country has the right to exploit such seabed or subsoil;
 - (10) waste and scrap derived from—
 - (A) production in the territory of one or more USMCA countries; or
 - (B) used goods collected in the territory of one or more USMCA countries, if such goods are fit only for the recovery of raw materials;
 - (11) a good produced in the territory of one or more USMCA countries exclusively from goods referred to in any of subparagraphs (1) through (10), inclusive, of this subdivision, or from their derivatives, at any stage of production.
- (v) Indirect material.—The term “indirect material” means a material used or consumed in the production, testing or inspection of a good but not physically incorporated into the good, or a material used or consumed in the maintenance of buildings or the operation of equipment associated with the production of a good, including—
 - (1) fuel and energy;

- (2) tools, dies and molds;
 - (3) spare parts and materials used or consumed in the maintenance of equipment or buildings;
 - (4) lubricants, greases, compounding materials and other materials used or consumed in production or to operate equipment or buildings;
 - (5) gloves, glasses, footwear, clothing, safety equipment and supplies;
 - (6) equipment, devices and supplies used for testing or inspecting the good;
 - (7) catalysts and solvents; and
 - (8) any other material that is not incorporated into the good, if the use of the material in the production of the good can reasonably be demonstrated to be a part of that production.
- (vi) Intermediate material.—The term “intermediate material” means a material that is self-produced, used or consumed in the production of a good, and designated as an intermediate material pursuant to subdivision (c)(ix) of this note.
- (vii) Material.—The term “material” means a good that is used or consumed in the production of another good and includes a part or an ingredient.
- (viii) Net cost.—The term “net cost” means total cost minus sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the total cost.
- (ix) Net cost of a good.—The term “net cost of a good” means the net cost that can be reasonably allocated to a good using one of the methods set forth in subdivision (c)(vii) above.
- (x) Nonallowable interest costs.—The term “nonallowable interest costs” means interest costs incurred by a producer that exceed 700 basis points above the applicable official interest rate for comparable maturities of the country in which the producer is located.
- (xi) Nonoriginating good or nonoriginating material.—The term “nonoriginating good” or “nonoriginating material” means a good or material, as the case may be, that does not qualify as originating under this note.
- (xii) Originating good; originating material.—The term “originating good” or “originating material” means a good or material, as the case may be, that qualifies as originating under this note.
- (xiii) Packaging materials and containers.—The term “packaging materials and containers” means materials and containers in which a good is packaged for retail sale.
- (xiv) Packing materials and containers.—The term “packing materials and containers” means materials and containers that are used to protect a good during transportation.
- (xv) Producer.—The term “producer” means a person who engages in the production of a good.
- (xvi) Production.—The term “production” means—
- (1) growing, cultivating, raising, mining, harvesting, fishing, trapping, hunting, capturing, breeding, extracting, manufacturing, processing or assembling a good; or
 - (2) the farming of aquatic organisms through aquaculture.
- (xvii) Reasonably allocate.—The term “reasonably allocate” means to apportion in a manner appropriate to the circumstances.
- (xviii) Recovered material.—The term “recovered material” means a material in the form of individual parts that are the result of—

USMCA

- (1) the disassembly of a used good into individual parts; and
 - (2) the cleaning, inspecting, testing or other processing that is necessary for improvement to sound working condition of such individual parts.
- (xix) Remanufactured good.—The term “remanufactured good” means a good classified in the tariff schedule under any of chapters 84 through 90 or under heading 9402, other than a good classified under heading 8418, 8509, 8516 or 8703 or subheading 8414.51, 8450.11, 8450.12, 8508.11 or 8517.11, that—
- (1) is entirely or partially composed of recovered materials;
 - (2) has a life expectancy similar to, and performs in a manner that is the same as or similar to, such a good when new; and
 - (3) has a factory warranty similar to that applicable to such a good when new.
- (xx) Royalties.—The term “royalties” means payments of any kind, including payments under technical assistance or similar agreements, made as consideration for the use of, or right to use, a copyright, literary, artistic or scientific work, patent, trademark, design, model, plan or secret formula or secret process, excluding payments under technical assistance or similar agreements that can be related to a specific service such as—
- (1) personnel training, without regard to where the training is performed; or
 - (2) if performed in the territory of one or more USMCA countries, engineering, tooling, die-setting, software design and similar computer services, or other services.
- (xxi) Sales promotion, marketing and after-sales service costs.—The term “sales promotion, marketing and after-sales service costs” means the costs related to sales promotion, marketing and after-sales service for the following:
- (1) sales and marketing promotion, media advertising, advertising and market research, promotional and demonstration materials, exhibits, sales conferences, trade shows, conventions, banners, marketing displays, free samples, sales, marketing and after-sales service literature (product brochures, catalogs, technical literature, price lists, service manuals and sales aid information), establishment and protection of logos and trademarks, sponsorships, wholesale and retail charges and entertainment;
 - (2) sales and marketing incentives, consumer, retailer or wholesaler rebates and merchandise incentives;
 - (3) salaries and wages, sales commissions, bonuses, benefits (such as medical, insurance and pension benefits), traveling and living expenses, and membership and professional fees for sales promotion, marketing and after-sales services personnel;
 - (4) product liability insurance;
 - (5) rent and depreciation of sales promotion, marketing and after-sales service offices and distribution centers;
 - (6) payments by the producer to other persons for warranty repairs;
 - (7) if the costs are identified separately for sales promotion, marketing or after-sales services of goods on the financial statements or cost accounts of the producer, the following:
 - (A) property insurance premiums, taxes utilities and repair and maintenance of sales promotion, marketing and after-sales service offices and distribution centers;
 - (B) recruiting and training of sales promotion, marketing and after-sales service personnel, and after-sales training of customers' employees;
 - (C) office supplies for sales promotion, marketing and after-sales service of goods;
 - (D) telephone, mail and other communications.

(xxii) Self-produced material.—The term “self-produced material” means a material that is produced by the producer of a good and used in the production of that good.

(xxiii) Shipping and packing costs.—The term “shipping and packing costs” means the costs incurred in packing a good for shipment and shipping the good from the point of direct shipment to the buyer, excluding the costs of preparing and packaging the good for retail sale.

(xxiv) Territory.—The term “territory” with respect to a USMCA country, has the meaning given that term in section C of chapter 1 of the USMCA, as further defined in subdivision (n) of this note.

(xxv) Total cost.—The term “total cost”—

(1) In general.—The term “total cost”—

(A) means all product costs, period costs and other costs for a good incurred in the territory of one or more USMCA countries; and

(B) does not include—

(I) profits that are earned by the producer of the good, regardless of whether the costs are retained by the producer or paid out to other persons as dividends; or

(II) taxes paid on those profits, including capital gains taxes.

(2) Other definitions.—In this subdivision—

(A) Other costs.—The term “other costs” means all costs recorded on the books of the producer that are not product costs or period costs, such as interest.

(B) Period costs.—The term “period costs” means costs, other than product costs, that are expensed in the period in which they are incurred, such as selling expenses and general and administrative expenses.

(C) Product costs.—The term “product costs” means costs that are associated with the production of a good, including the value of materials, direct labor costs and direct overhead.

(xxvi) Transaction value.—The term transaction value” means the price—

(1) actually paid or payable for a good or material with respect to a transaction of a producer; and

(2) adjusted in accordance with the principles set forth in paragraphs 1, 3 and 4 of article 8 of the Customs Valuation Agreement.

(xxvii) USMCA country.—The term “USMCA country” means the United States, Canada or Mexico for such time as the USMCA is in force with respect to Canada or Mexico, and the United States applies the USMCA to Canada or Mexico.

(xxviii) Value.—The term “value” means the value of a good or material for purposes of calculating customs duties or applying this note.

(m) Application and interpretation.—In this note:

(i) The basis for any tariff classification is the Harmonized Tariff Schedule of the United States.

(ii) Whenever in this note there is a reference to a chapter, heading, subheading or tariff item, that reference shall be a reference to a chapter, heading, subheading or tariff item (meaning a provision designated by eight digits) of the tariff schedule.

(iii) Any cost or value referred to in this note with respect to a good shall be recorded and maintained in accordance with the generally accepted accounting principles applied in the territory of the USMCA country in which the good is produced.

- (iv) For purposes of this note and for purposes of implementing the preferential tariff treatment provided for under the USMCA, except as otherwise provided in this note, a good is an originating good if satisfies all requirements under this note and under regulations issued by the Secretary pursuant to the USMCA.
- (v) A rule applicable to a tariff item shall take precedence over a rule applicable to the heading or subheading which is parent to that tariff item.
- (vi) A reference to weight in the rules in subdivision (o) of this note for goods provided for in chapters 1 through 24 of the tariff schedule means dry weight unless otherwise specified in the tariff schedule.
- (vii) A requirement of a change in tariff classification in subdivision (o) of this note applies only to nonoriginating materials.
- (n) Interpretation of rules of origin.--For purposes of this note—
 - (i) Except for a good provided for in any of chapters 61 to 63 of the tariff schedule, a good is an originating good if—
 - (A) it is produced entirely in the territory of one or more USMCA countries;
 - (B) one or more of the nonoriginating materials provided for as “parts” in the tariff schedule and used in the production of the good cannot satisfy the requirements set out in subdivision (o) of this note, because—
 - (1) both the good and its materials are classified in the same subheading or in the same heading that is not further subdivided into subheadings, or
 - (2) the good was imported into the territory of a USMCA country in an unassembled or a disassembled form but was classified as an assembled good pursuant to general interpretive rule 2(a) of the tariff schedule; and
 - (C) the regional value content of the good, determined in accordance with subdivision (c) of this note, is not less than 60 percent if the transaction value method is used, or not less than 50 percent if the net cost method is used.
 - (ii) Non-qualifying operations. Each USMCA country shall provide that a good shall not be considered to be an originating good merely by reason of--
 - (A) mere dilution with water or another substance that does not materially alter the characteristics of the good; or
 - (B) a production or pricing practice in respect of which it may be demonstrated, on the basis of a preponderance of evidence, that the object was to circumvent this note and applicable regulations.
 - (iii) For the purposes of applying this note to goods of chapters 6 through 14, inclusive, agricultural and horticultural goods grown in the territory of a USMCA country shall be treated as originating in territory of that USMCA country even if grown from seed, bulbs, rootstock, cuttings, slips or other live parts of plants imported from a non-USMCA country.
 - (iv) A good of any heading in chapters 28 through 38, inclusive, that satisfies one or more of the provisions enumerated in this subdivision shall be treated as an originating good, except as otherwise specified in those rules. Notwithstanding the preceding sentence, a good is an originating good if it meets the applicable change in tariff classification or satisfies the applicable value content requirement specified in subdivision (o) of this note.
 - (A) A good of chapters 28 through 38, except a good of headings 3301 or 3823 or subheadings 2916.32 or 3502.11 through 3502.19, that results from a chemical reaction in the territory of one or more USMCA countries shall be treated as an originating good.
 - (B) For the purposes of this note, a “chemical reaction” is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for the purposes of determining whether a good is an originating good:
 - (1) dissolution in water or in another solvent;

- (2) the elimination of solvents, including solvent water; or
 - (3) the addition or elimination of water of crystallisation.
- (C) A good of chapters 28 through 38, except for a good of heading 3301 or subheadings 3502.11 through 3502.19, that is subject to purification is an originating good, provided that the purification occurs in the territory of one or more of the USMCA countries and results in the following:
- (1) the elimination of not less than 80 percent of the content of existing impurities; or
 - (2) the reduction or elimination of impurities resulting in a good suitable for one or more of the following:
 - (I) as a pharmaceutical, medical, cosmetic, veterinary, or food grade substance,
 - (II) as a chemical product or reagent for analytical, diagnostic, or laboratory uses,
 - (III) as an element or component for use in micro-elements,
 - (IV) for specialized optical uses,
 - (V) for non-toxic uses for health and safety;
 - (VI) for biotechnical use (e.g. in cell culturing, in genetic technology, or as a catalyst),
 - (VII) as a carrier used in a separation process, or
 - (VIII) or nuclear grade uses.
- (D) A good of chapters 28 through 38, except for a good of chapters 28, 29, or 32, headings 3301 or 3808, or subheadings 3502.11 through 3502.19 is an originating good if the deliberate and proportionally controlled mixing or blending (including dispersing) of materials other than the addition of diluents, to conform to predetermined specifications occurs in the territory of one or more of the USMCA countries, resulting in a good having essential physical or chemical characteristics that are relevant to the purposes or uses of the good and are different from the input materials.
- (E) A good of chapters 28 through 38, except for a good of chapters 28, 29, 32 or 38, heading 3301 or subheadings 3502.11 through 3502.19, is an originating good if the deliberate and controlled modification in particle size of a good, including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing or pressing, occurs in the territory of one or more of the USMCA countries, resulting in a good with a defined particle size, defined particle size distribution or defined surface area, that is relevant to the purposes of the resulting good, and having essential physical or chemical characteristics different from the input materials.
- (F) A good of chapters 28 through 38, except for a good of heading 3301 or subheadings 3502.11 through 3502.19, is an originating good if the standards material is produced in the territory of one or more of the USMCA countries. For the purposes of this rule, a "standards material" (including a standard solution) is a preparation suitable for analytical, calibrating or referencing uses, having precise degrees of purity or proportions that are certified by the manufacturer.
- (G) A good of chapters 28 through 38, except for a good of heading 3301 or subheadings 3502.11 through 3502.19, is an originating good if the isolation or separation of isomers from mixtures of isomers occurs in the territory of one or more of the USMCA countries.
- (H) A good of chapters 28 through 38, except for a good of heading 3301 or subheadings 3502.11 through 3502.19, that undergoes a change from one classification to another in the territory of one or more of the USMCA countries as a result of the separation of one or more materials from a man-made mixture, shall not be treated as an originating good unless the isolated material underwent a chemical reaction in the territory of one or more of the USMCA countries.
- (I) A good of chapters 28 through 38, except for a good of headings 2930 through 2942, chapter 30, heading 3301 or subheadings 3502.11 through 3502.19, is an originating good if it undergoes a biochemical process or one or more of the following processes:

- (1) Biological or biotechnological culturing, hybridization or genetic modification of:
 - (I) Micro-organisms (bacteria, viruses (includes phages) etc.), or
 - (II) Human, animal or plant cells;
 - (2) Production, isolation, or purification of cellular or intercellular structures (such as isolated genes, gene fragments, and plasmids); or
 - (3) Products obtained by fermentation.
- (v) A good of any heading in chapters 39 through 40 that satisfies one or more of the provisions enumerated in this subdivision shall be treated as an originating good, except as otherwise specified in those rules. Notwithstanding the preceding sentence, a good is an originating good if it meets the applicable change in tariff classification or satisfies the applicable value content requirement specified in subdivision (o) of this note.
- (A) A good of chapters 39 through 40 that results from a chemical reaction in the territory of one or more of the USMCA countries shall be treated as an originating good.
 - (B) For the purposes of this rule, a “chemical reaction” is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for the purposes of determining whether a good is an originating good under this note:
 - (1) dissolution in water or in another solvent;
 - (2) the elimination of solvents, including solvent water; or
 - (3) the addition or elimination of water of crystallization.
 - (C) A good of chapters 39 through 40 that is subject to purification is an originating good, provided that the purification occurs in the territory of one or more of the USMCA countries and results in the following:
 - (1) the elimination of not less than 80 percent of the content of existing impurities; or
 - (2) the reduction or elimination of impurities resulting in a good suitable for one or more of the following:
 - (I) as a pharmaceutical, medical, cosmetic, veterinary, or food grade substance,
 - (II) as a chemical product or reagent for analytical, diagnostic, or laboratory uses,
 - (III) as an element or component for use in micro-elements,
 - (IV) for specialized optical uses,
 - (V) for non-toxic uses for health and safety,
 - (VI) for biotechnical use (e.g., in cell culturing, in genetic technology, or as a catalyst),
 - (VII) as a carrier used in a separation process, or
 - (VIII) for nuclear grade uses.
 - (D) A good of chapter 39 is an originating good if the deliberate and proportionally-controlled mixing or blending (including dispersing) of materials, other than the addition of diluents, to conform to predetermined specifications occurs in the territory of one or more of the USMCA countries, resulting in the production of a good having essential physical or chemical characteristics that are relevant to the purposes or uses of the good and are different from the input materials.

- (E) A good of chapters 28 through 38, except for a good of chapters 28, 29, 32 or 38, heading 3301 or subheadings 3502.11 through 3502.19, is an originating good if the deliberate and controlled modification in particle size of a good, including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing or pressing, occurs in the territory of one or more of the USMCA countries, resulting in a good with a defined particle size, defined particle size distribution or defined surface area, that is relevant to the purposes of the resulting good, and having essential physical or chemical characteristics different from the input materials.
 - (F) A good of chapter 39 is an originating good if the standards material is produced in the territory of one or more of the USMCA countries. For the purposes of this note, a "standards material" (including a standard solution) is a preparation suitable for analytical, calibrating or referencing uses, having precise degrees of purity or proportions that are certified by the manufacturer.
 - (G) A good of chapter 39 is an originating good if the isolation or separation of isomers from mixtures of isomers occurs in the territory of one or more of the USMCA countries.
 - (H) A good of chapter 39 is an originating good if it undergoes a biochemical process or through one or more of the following processes:
 - (1) Biological or biotechnological culturing, hybridization, or genetic modification of:
 - (I) Micro-organisms (bacteria, viruses (includes phages) etc.), or
 - (II) Human, animal or plant cells;
 - (2) Production, isolation or purification of cellular or intercellular structures (such as isolated genes, gene fragments and plasmids); or
 - (3) Fermentation.
 - (vi) The textile and apparel rules set forth in this note are applied conjunction with subdivision (b) and all other applicable provisions for such goods. For the purposes of these rules, the term "wholly" means that the good is made entirely or solely of the named material.
 - (vii) A good classified in chapters 50 through 63, inclusive, shall be considered originating, notwithstanding the origin of the following materials, provided that the good otherwise meets the applicable product specific rule set forth in subdivision (o) of this note:
 - (A) rayon filament, other than lyocell or acetate, of headings 5403 or 5405, or
 - (B) rayon fiber, other than lyocell or acetate, of headings 5502, 5504 or 5507.
 - (viii) A product-specific rule set forth in subdivision (o) of this note which requires a change to one or more tariff items shall apply to all goods provided for in such tariff item or items, and such goods shall be eligible for the tariff treatment provided for in this note only under the terms of such rule and not under any product-specific rule requiring tariff classification changes at the subheading or heading level. For purposes of this note, the term "tariff item" means a provision of the tariff schedule that appears at the eight (8) digit level and that is not part of the Harmonized System.
- (o) Change in tariff classification rules.

Chapter 27

Chapter rule 1: Notwithstanding the applicable product-specific rules of origin, a good of chapter 27 that is the product of a chemical reaction is an originating good if the chemical reaction occurred in the territory of one or more of the USMCA countries.

For the purposes of this rule, a “chemical reaction” is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for the purposes of this definition:

- (a) dissolving in water or other solvents;
- (b) the elimination of solvents, including solvent water; or
- (c) the addition or elimination of water of crystallisation.

Heading rule: For the purposes of heading 2710, the following processes confer origin:

- (a) Atmospheric distillation—a separation process in which petroleum oils are converted, in a distillation tower, into fractions according to boiling point and the vapor then condensed into different liquefied fractions. Liquefied petroleum gas, naphtha, gasoline, kerosene, diesel/heating oil, light gas oils, and lubricating oil are produced from petroleum distillation;
- (b) Vacuum distillation—distillation at a pressure below atmospheric but not so low that it would be classed as molecular distillation. Vacuum distillation is useful for distilling high-boiling and heat-sensitive materials such as heavy distillates in petroleum oils to produce light to heavy vacuum gas oils and residuum. In some refineries gas oils may be further processed into lubricating oils;
- (c) Catalytic hydroprocessing—the cracking or treating of petroleum oils with hydrogen at high temperature and under pressure, in the presence of special catalysts. Catalytic hydroprocessing includes hydrocracking and hydrotreating;
- (d) Reforming (catalytic reforming)—the rearrangement of molecules in a naphtha boiling range material to form higher octane aromatics (i.e., improved antiknock quality at the expense of gasoline yield). A main product is catalytic reformat, a blend component for gasoline. Hydrogen is another by-product;
- (e) Alkylation—a process whereby a high-octane blending component for gasolines is derived from catalytic combination of an isoparaffin and an olefin;
- (f) Cracking—a refining process involving decomposition and molecular recombination of organic compounds, especially hydrocarbons obtained by means of heat, to form molecules suitable for motor fuels, monomers, petrochemicals, etc.;
- (i) Thermal cracking—exposes the distillate to temperatures of approximately 540-650 degrees C (1000-1200 degrees F) for varying periods of time. Process produces modest yields of gasoline and higher yields of residual products for fuel oil blending, or

Harmonized Tariff Schedule of the United States (2026)

Annotated for Statistical Reporting Purposes

GN p.32

USMCA

- (ii) Catalytic cracking—hydrocarbon vapors are passed at approximately 400 degrees C (750 degrees F) over a metallic catalyst (e.g., silica-alumina or platinum); the complex recombinations (alkylation, polymerization, isomerization, etc.) occur within seconds to yield high-octane gasoline. Process yields less residual oils and lightgases than thermal cracking;
- (g) Coking—a thermal cracking process for the conversion of heavy low grade products, such as reduced crude, straight run pitch, cracked tars, and shale oil into solid coke (carbon) and lower boiling hydrocarbon products which are suitable as feed for other refinery units for conversion into lighter products; and
- (h) Isomerization—the refinery process of converting petroleum compounds into their isomers.

Heading rule: For the purposes of heading 2710, “direct blending” is a refinery process whereby various petroleum streams from processing units and petroleum components from holding/storage tanks combine to create a finished product, with pre-determined parameters, classified under heading 2710, provided that the nonoriginating material constitutes no more than 25 percent by volume of the good.

Heading rule: For the purposes of determining whether or not a good of heading 2709 is an originating good, the origin of diluent of headings 2709 or 2710 that is used to facilitate the transportation between USMCA countries of crude petroleum oils and crude oils obtained from bituminous minerals of heading 2709 is disregarded, provided that the diluent constitutes no more than 40 percent by volume of the good.

1. A change to headings 2701 through 2703 from any other chapter.
2. A change to heading 2704 from any other heading.
3. A change to headings 2705 through 2706 from any other heading, including another heading within that group.
4. (A) A change to subheadings 2707.10 through 2707.91 from any other heading; or
(B) A change to subheadings 2707.10 through 2707.91 from any other subheading within heading 2707, whether or not there is also a change from any other heading, provided that the good resulting from such change is the product of a chemical reaction.
5. (A) A change to subheading 2707.99 from any other heading;
(B) A change to phenols of subheading 2707.99 from within that subheading or any other subheading within heading 2707, whether or not there is also a change from any other heading, provided that the good resulting from such change is the product of a chemical reaction; or
(C) A change to any other good of subheading 2707.99 from phenols of that subheading or any other subheading within heading 2707, whether or not there is also a change from any other heading, provided that the good resulting from such change is the product of a chemical reaction.
6. A change to headings 2708 through 2709 from any other heading, including another heading within that group.

Subheading rule: Notwithstanding subdivision (e)(ii), subdivision (e)(i) applies to:

- (a) nonoriginating light oils and preparations of subheading 2710.20 when used in the production of other goods of subheading 2710.20; and
 - (b) nonoriginating other oils of subheading 2710.20 when used in the production of light oils or preparations of subheading 2710.20.
7. (A) A change to heading 2710 from any other heading, except from headings 2711 through 2715;
(B) Production of any good of heading 2710 as the result of atmospheric distillation, vacuum distillation, catalytic hydroprocessing, catalytic reforming, alkylation, catalytic cracking, thermal cracking, coking or isomerization; or
(C) Production of any good of heading 2710 as the result of direct blending, provided that:

Chapter 63

Chapter Rule 1: For the purposes of determining the origin of a good of this chapter, the rule applicable to that good shall only apply to the component that determines the tariff classification of the good and such component must satisfy the tariff change requirements set out in the rule for that good.

Chapter Rule 2: Effective January 1, 2022, and notwithstanding chapter rule 1 of this chapter, for the purposes of determining the origin of a good of this chapter, a good of this chapter containing fabrics of heading 5903 shall be considered originating only if all fabrics used in the production of the fabrics of heading 5903 are formed and finished in the territory of one or more of the USMCA countries. This note shall not apply to goods of heading 6305, goods of subheadings 6306.12 or 6306.22 or goods of subheading 6307.90 that are not surgical drapes or national flags.

1. A change to headings 6301 through 6302 from any other chapter, except from headings 5106 through 5113, 5204 through 5212, 5310 through 5311, chapters 54 through 55, or headings 5801 through 5802 or 6001 through 6006, provided that the good is both cut (or knit to shape) and sewn or otherwise assembled in the territory of one or more of the USMCA countries.
2. A change to subheadings 6303.12 through 6303.91 from any other chapter, except from headings 5106 through 5113, 5204 through 5212, 5310 through 5311, chapters 54 through 55 or headings 5801 through 5802 or 6001 through 6006, provided that the good is both cut (or knit to shape) and sewn or otherwise assembled in the territory of one or more of the USMCA countries.
3. (A) A change to curtains of subheading 6303.92 made of fabrics wholly of non-textured polyester filaments from yarn, with a twist of 900 or more turns per meter, wholly of polyesters other than partially oriented, measuring not less than 75 decitex but not more than 80 decitex, and having 24 filaments per yarn of subheadings 5402.44, 5402.47 or 5402.52, provided that the good is both cut and sewn or otherwise assembled in the territory of one or more of the USMCA countries, and such goods will not be subject to chapter rule 2 of this chapter;

(B) A change to any other good of subheading 6303.92 from any other chapter, except from headings 5106 through 5113, 5204 through 5212, 5310 through 5311, chapters 54 through 55 or headings 5801 through 5802 or 6001 through 6006, provided that the good is both cut (or knit to shape) and sewn or otherwise assembled in the territory of one or more of the USMCA countries.
4. A change to subheading 6303.99 from any other chapter, except from headings 5106 through 5113, 5204 through 5212, 5310 through 5311, chapters 54 through 55 or headings 5801 through 5802 or 6001 through 6006, provided that the good is both cut (or knit to shape) and sewn or otherwise assembled in the territory of one or more of the USMCA countries.
5. A change to headings 6304 through 6310 from any other chapter, except from headings 5106 through 5113, 5204 through 5212, 5310 through 5311, chapters 54 through 55 or headings 5801 through 5802 or 6001 through 6006, or other made-up textile articles of heading 9619, provided that the good is both cut (or knit to shape) and sewn or otherwise assembled in the territory of one or more of the USMCA countries.

Chapter 64

1. A change to headings 6401 through 6405 from any heading outside that group, except from subheading 6406.10, provided there is a regional value content of not less than 55 percent under the net cost method.
2. A change to subheading 6406.10 from any other subheading, except from headings 6401 through 6405, provided there is a regional value content of not less than 55 percent under the net cost method.
3. A change to subheadings 6406.20 through 6406.90 from any other chapter.

Chapter 84

Chapter rule 1: For the purposes of this chapter, the term “printed circuit assembly” means a good consisting of one or more printed circuits of heading 8534 with one or more active elements assembled thereon, with or without passive elements. For the purposes of this note, “active elements” means diodes, transistors and similar semiconductor devices, whether or not photosensitive, of heading 8541 and integrated circuits of heading 8542 and microassemblies of headings 8543 or 8548.

Chapter rule 2: For the purposes of subheading 8471.49, the origin of each unit presented within a system shall be determined in accordance with the rule that would be applicable to such unit if it were presented separately and the rate of duty applicable to each unit presented within a system shall be:

(a) in the case of the territory of Mexico, the rate that would be applicable to such unit if it were presented separately; and

(b) in the case of the territory of Canada and the territory of the United States, the rate that is applicable to such unit under the appropriate tariff item within subheading 8471.49.

For the purposes of this rule, the term “unit presented within a system” shall mean:

(a) a separate unit as described in Note 5(B) to chapter 84 of the tariff schedule; or

(b) any other separate machine that is presented and classified with a system under subheading 8471.49.

Chapter rule 3: The following are parts for those goods of subheadings 8443.31 or 8443.32:

(a) control or command assemblies, incorporating more than one of the following: printed circuit assembly; hard or flexible (floppy) disc drive; keyboard; user interface;

(b) light source assemblies, incorporating more than one of the following: light emitting diode assembly; gas laser; mirror polygon assembly; base casting;

(c) laser imaging assemblies, incorporating more than one of the following: photoreceptor belt or cylinder; toner receptacle unit; toner developing unit; charge/discharge unit; cleaning unit;

(d) image fixing assemblies, incorporating more than one of the following: fuser; pressure roller; heating element; release oil dispenser; cleaning unit; electrical control;

(e) ink-jet marking assemblies, incorporating more than one of the following: thermal print head; ink dispensing unit; nozzle and reservoir unit; ink heater;

(f) maintenance/sealing assemblies, incorporating more than one of the following: vacuum unit; ink-jet covering unit; sealing unit; purging unit;

(g) paper handling assemblies, incorporating more than one of the following: paper transport belt; roller; print bar; carriage; gripper roller; paper storage unit; exit tray;

(h) thermal transfer imaging assemblies, incorporating more than one of the following: thermal print head, cleaning unit; supply or take-up roller;

(i) ionographic imaging assemblies, incorporating more than one of the following: ion generation and emitting unit; air assist unit; printed circuit assembly; charge receptor belt or cylinder; toner receptacle unit; toner distribution unit; developer receptacle and distribution unit; developing unit; charge/discharge unit; cleaning unit; or

(j) combinations of the above specified assemblies.

Chapter rule 4: The following are parts for facsimile machines:

- (a) control or command assemblies, incorporating more than one of the following: printed circuit assembly; modem; hard or flexible (floppy) disc drive; keyboard; user interface;
- (b) optics module assemblies, incorporating more than one of the following: optics lamp; charge couples device and appropriate optics; lenses; mirror;
- (c) laser imaging assemblies, incorporating more than one of the following: photoreceptor belt or cylinder; toner receptacle unit; toner developing unit; charge/discharge unit; cleaning unit;
- (d) ink-jet marking assemblies, incorporating more than one of the following: thermal print head; ink dispensing unit; nozzle and reservoir unit; ink heater;
- (e) thermal transfer imaging assemblies, incorporating more than one of the following: thermal print head, cleaning unit; supply or take-up roller;
- (f) ionographic imaging assemblies, incorporating more than one of the following: ion generation and emitting unit; air assist unit; printed circuit assembly; charge receptor belt or cylinder; toner receptacle unit; toner distribution unit; developer receptacle and distribution unit; developing unit; charge/discharge unit; cleaning unit;
- (g) image fixing assemblies, incorporating more than one of the following: fuser; pressure roller; heating element; release oil dispenser; cleaning unit; electrical control;
- (h) paper handling assemblies, incorporating more than one of the following: paper transport belt; roller; print bar; carriage; gripper roller; paper storage unit; exit tray; or
- (i) combinations of the above specified assemblies.

Chapter rule 5: The following are parts for photocopying apparatus of subheadings 8443.32 and 8443.39 which refer to this rule:

- (a) imaging assemblies, incorporating more than one of the following: photoreceptor belt or cylinder; toner receptacle unit; toner distribution unit; developer receptacle unit; developer distribution unit; charge/discharge unit; cleaning unit;
- (b) optics assemblies, incorporating more than one of the following: lens; mirror; illumination source; document exposure glass;
- (c) user control assemblies incorporating more than one of the following: printed circuit assembly; power supply; user input keyboard; wiring harness; display unit (cathode-ray type or flat panel);
- (d) image fixing assemblies, incorporating more than one of the following: fuser; pressure roller; heating element; release oil dispenser; cleaning unit; electrical control;
- (e) paper handling assemblies incorporating more than one of the following: paper transport belt; roller; print bar; carriage; gripper roller; paper storage unit; exit tray;
- (f) or combinations of the above specified assemblies.

Chapter rule 6: The origin of each unit presented within a system shall be determined as though each unit were presented separately and were classified under the appropriate tariff provision for that unit.

Chapter rule 7: For the purposes of the subdivisions pertaining to this chapter, whenever the subdivision designation is underscored, the provisions of subdivision (k) of this note may apply to goods for use in a motor vehicle of chapter 87.

Chapter 85

Chapter Rule 1: For the purposes of this chapter, the term “printed circuit assembly” means a good consisting of one or more printed circuits of heading 8534 with one or more active elements assembled thereon, with or without passive elements. For the purposes of this Note, “active elements” means diodes, transistors and similar semiconductor devices, whether or not photosensitive, of heading 8541, integrated circuits of heading 8542, and microassemblies of headings 8543 or 8548.

Chapter Rule 2: For purposes of this chapter:

(a) references to “high definition” as it applies to television receivers and cathode-ray tubes refers to goods having:

(i) an aspect ratio of the screen equal to or greater than 16:9, and

(ii) a viewing screen capable of displaying more than 700 scanning lines; and

(iii) the video display diagonal is determined by measuring the maximum straight line dimension across the visible portion of the face plate used for displaying video.

Chapter Rule 3: Tariff items 8529.90.83, 8529.90.93 and 8529.90.99 cover the following parts of television receivers, video monitors, and video projectors:

(a) Video intermediate (IF) amplifying and detecting systems;

(b) Video processing and amplification systems;

(c) Synchronizing and deflection circuitry;

(d) Tuners and tuner control systems; and

(e) Audio detection and amplification systems.

Chapter Rule 4: For the purposes of tariff item 8540.91.15, the term “front panel assembly” refers to:

(a) with respect to a monochrome cathode-ray television picture tube, video monitor tube or video projector tube, an assembly which consists of either a glass panel or a glass envelope, which is suitable for incorporation into a monochrome cathode-ray television picture tube, video monitor tube or video projector tube and which has undergone the necessary chemical and physical processes for imprinting

phosphors on the glass panel or glass envelope with sufficient precision to render a video image when excited by a stream of electrons;
or

(b) with respect to a color cathode-ray television picture tube, video monitor tube or video projector tube, an assembly which consists of a glass panel and a shadow mask or aperture grille, attached for ultimate use, which is suitable for incorporation into a color cathode-ray television picture tube, video monitor tube or video projector tube and which has undergone the necessary chemical and physical processes for imprinting phosphors on the glass panel with sufficient precision to render a video image when excited by a stream of electrons.

Chapter Rule 5: The origin of a television combination unit shall be determined in accordance with the rule that would be applicable to such unit if it were solely a television receiver.

Chapter rule 6: For the purposes of the subdivisions pertaining to this chapter, whenever the subdivision designation is underscored, the provisions of subdivision (k) of this note may apply to goods for use in a motor vehicle of chapter 87.

Heading rule: The underscoring of the designations in subdivision 1 pertain to goods provided for in heading 8501 for use in a motor vehicle of chapter 87.
