- (A) For purposes of subdivision (b)(ii)(B) of this note, the regional value content of an automotive good referred to in subdivision (n) of this note may be calculated by the importer, exporter or producer of the good on the basis of the following net cost method:

$$RVC = ((NC - VNM)/NC) \times 100$$

where RVC is the regional value content of the automotive good, expressed as a percentage; NC is the net cost of the automotive good; and VNM means the value of nonoriginating materials that are acquired and used by the producer in the production of the automotive good, but does not include the value of a material that is self-produced. For purposes of this subdivision, the term "automotive good" means a good provided for in any of subheadings 8407.31 through 8407.34, subheading 8408.20, heading 8409 or in any of headings 8701 through 8708, inclusive, of the tariff schedule.

- (B) For purposes of determining the regional value content under this subdivision for an automotive good that is a motor vehicle provided for in any of headings 8701 through 8705, an importer, exporter or producer may average the amounts calculated under the formula contained in subdivision (A) above, over the producer's fiscal year--

  - (2) is the same class of motor vehicles, and is produced in the same plant in the territory of Peru or the United States, as the good described in subdivision (B) for which regional value content is being calculated; or
  - (3) is the same model line of motor vehicles produced in the territory of Peru or the United States as the good described in subdivision (B) for which regional value content is being calculated.
- (D) For purposes of determining the regional value content under subdivision (A) above for automotive materials provided for in any of subheadings 8407.31 through 8407.34, in subheading 8408.20 or in heading 8409, 8706, 8707 or 8708, that are produced in the same plant, an importer, exporter or producer may--
- (1) average the amounts calculated under the formula contained in subdivision (A) above over--
    - (I) the fiscal year of the motor vehicle producer to whom the automotive goods are sold,
    - (II) any quarter or month, or
    - (III) the fiscal year of the producer of such goods,if the goods were produced during the fiscal year, quarter or month that is the basis for the calculation;
  - (2) determine the average referred to in subdivision (1) separately for such goods sold to one or more motor vehicle producers; or
  - (3) make a separate determination under subdivision (1) or (2) for automotive goods that are exported to the territory of Peru or the United States.
- (E) The importer, exporter or producer of an automotive good shall, consistent with the provisions regarding allocation of costs provided for in generally accepted accounting principles, determine the net cost of an automotive good under subdivision (B) by--

- (ii) For shipment.--Packing materials and containers for shipment shall be disregarded in determining whether a good is an originating good.
- (j) Indirect materials.
- An indirect material shall be treated as an originating material for purposes of this note without regard to where it is produced. - (ii) Where a specific rule in subdivision (n) of this note is defined using the criterion of a change in tariff classification, and the rule is written to exclude tariff provisions at the level of a chapter, heading or subheading of the tariff schedule, such rule shall be construed to require that materials classified in those excluded provisions be originating for the good to qualify as originating.
- (iii) When a heading or subheading of the tariff schedule is subject to alternative specific rules in subdivision (n) of this note, the rule will be considered to be met if a good satisfies one of the alternatives.
- (iv) When a single rule is applicable to a group of headings or subheadings, and that rule of origin specifies a change of heading or subheading, the requirement shall be interpreted so that the change of heading or subheading may occur within a single heading or subheading or between headings or subheadings of the group. When, however, a rule refers to a change in heading or subheading "outside that group," such change in heading or subheading must occur from a heading or subheading that is outside the group of headings or subheadings set out in the rule.

For purposes of applying this subdivision to goods of the foregoing chapters, a "chemical reaction" is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for purposes of determining whether a good is originating:
    - (1) dissolution in water or in another solvent;
    - (2) the elimination of solvents, including solvent water; or
    - (3) the addition or elimination of water of crystallization.
  - (B) For the purposes of chapters 28 through 40, a good that is subject to purification shall be treated as originating provided that one of the following occurs in the territory of Peru, the United States, or both:

- (K) except as provided in subdivisions (A) through (J) above and subdivision (o) of this note, a nonoriginating material used in the production of a good provided for in any of chapters 1 through 24, unless the nonoriginating material is provided for in a different subheading than the good for which origin is being determined under this note.
- (iii) For the purposes of this note, the term “adjusted value” means the value determined in accordance with Articles 1 through 8, Article 15 and the corresponding interpretive notes of the Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade 1994 referred to in section 101(d)(8) of the Uruguay Round Agreements Act (19 U.S.C. 3511(d)(8)), adjusted, if necessary, to exclude any costs, charges or expenses incurred for transportation, insurance and related services incident to the international shipment of the merchandise from the country of exportation to the place of importation.
- (f) Accumulation.
- (i) For purposes of this note, originating materials from the territory of Korea or the United States that are used in the production of a good in the territory of the other country shall be considered to originate in the territory of such other country.
- (ii) A good that is produced in the territory of Korea or of the United States, or both, by one or more producers, is an originating good if the good satisfies all of the applicable requirements of this note.
- (g) Regional value content.
- (i) For purposes of subdivision (b)(ii)(B) of this note, the regional value content for a good referred to in subdivision (o) of this note, except for goods to which subdivision (h) applies, shall be calculated by the importer, exporter or producer of the good, on the basis of the build-down method described in subdivision (g)(i)(A) or the build-up method described in (g)(i)(B) below.
- (A) For the build-down method, the regional value content of a good may be calculated on the basis of the formula  $RVC = ((AV - VNM)/AV) \times 100$ , where RVC is the regional value content, expressed as a percentage; AV is the adjusted value of the good; and VNM is the value of nonoriginating materials, other than indirect materials, acquired and used by the producer in the production of the good, but does not include the value of a material that is self-produced; or
- (B) For the build-up method, the regional value content may be calculated on the basis of the formula  $RVC = (VOM / AV) \times 100$ , where RVC is the regional value content, expressed as a percentage; AV is the adjusted value of the good; and VOM is the value of originating materials, other than indirect materials, that are acquired or self-produced, and used by the producer in the production of the good.
- (ii) Value of materials.
- (A) For the purpose of calculating the regional value content of a good under subdivision (g)(i) and for purposes of applying the de minimis provisions of subdivision (e) of this note, the value of a material is:
- (1) in the case of a material that is imported by the producer of the good, the adjusted value of the material;
- (2) in the case of a material acquired in the territory in which the good is produced, the value, determined in accordance with Articles 1 through 8, Article 15 and the corresponding interpretive notes, of the Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade 1994 referred to in section 101(d)(8) of the Uruguay Round Agreements Act (19 U.S.C. 3511(d)(8)), as set forth in regulations promulgated by the Secretary of the Treasury providing for the application of such Articles in the absence of an importation by the producer; or
- (3) in the case of a material that is self-produced, the sum of—
- (i) all expenses incurred in the production of the material, including general expenses, and
- (ii) an amount for profit equivalent to the profit added in the normal course of trade.
- (B) The value of materials may be further adjusted as follows:
- (1) for originating materials, the following expenses, if not included in the value of an originating material calculated under subdivision (A) above, may be added to the value of the originating material:

- (I) the costs of freight, insurance, packing and all other costs incurred in transporting the material within or between the territory of Korea or of the United States, or both, to the location of the producer;
  - (II) duties, taxes and customs brokerage fees on the material paid in the territory of Korea or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable; and
  - (III) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or byproducts; and
- (2) for non-originating materials, if included the value of a nonoriginating material calculated under subdivision (A) above, the following expenses may be deducted from the value of the nonoriginating material:
- (I) the costs of freight, insurance, packing and all other costs incurred in transporting the material within or between the territory of Korea or of the United States, or both, to the location of the producer;
  - (II) duties, taxes and customs brokerage fees on the material paid in the territory of Korea or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable;
  - (III) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or by-products; or
  - (IV) the cost of originating materials used in the production of the nonoriginating material in the territory of Korea or of the United States, or both.
- (C) All costs considered for the calculation of regional value content shall be recorded and maintained in conformity with the generally accepted accounting principles applicable in the territory of the country in which the good is produced (whether Korea or the United States). The term "generally accepted accounting principles"--
- (i) means the recognized consensus or substantial authoritative support given in the territory of Korea or of the United States, as the case may be, with respect to the recording of revenues, expenses, costs, assets and liabilities, the disclosure of information and the preparation of financial statements, and
  - (ii) may encompass broad guidelines for general application as well as detailed standards, practices and procedures.
- (h) Automotive goods.
- (i) For purposes of subdivision (b)(ii)(B) of this note, the regional value content of an automotive good referred to in subdivision (o) of this note may be calculated by the importer, exporter or producer of the good on the basis of the build-down method described in subdivision (g)(i)(A) of this note, the build-up method described in subdivision (g)(i)(B) of this note or the following net cost method,  $RVC = (NC - VNM) / NC \times 100$ , where RVC is the regional value content, expressed as a percentage; NC is the net cost of the good; and VNM is the value of nonoriginating materials, other than indirect materials, acquired and used by the producer in the production of the automotive good, but does not include the value of a material that is self-produced.
  - (ii) For purposes of this subdivision, the term "automotive good" means a good provided for in any of subheadings 8407.31 through 8407.34, subheading 8408.20, heading 8409 or any of headings 8701 through 8708.
  - (iii) For purposes of determining the regional value content under subdivision (h)(i) of this note for an automotive good that is a motor vehicle provided for in any of headings 8701 through 8705, an importer, exporter or producer may average the amounts calculated under the net cost formula contained in subdivision (h)(i), over the producer's fiscal year--
    - (A) with respect to all motor vehicles in any one of the categories described in subdivision (h)(iv), or
    - (B) with respect to all motor vehicles in any such category that are exported to the territory of Korea or of the United States.
  - (iv) A category is described in this subdivision if it--

  - (B) is the same class of motor vehicles, and is produced in the same plant in the territory of Korea or of the United States, as the good described in subdivision (h)(iii) for which regional value content is being calculated; or
  - (C) is the same model line of motor vehicles produced in the territory of Korea or of the United States as the good described in subdivision (h)(iii) for which regional value content is being calculated.
- (v) The term “class of motor vehicles” means any one of the following categories of motor vehicles:
- (A) motor vehicles provided for in subheading 8701.20, 8704.10, 8704.22, 8704.23, 8704.32 or 8704.90, or heading 8705 or 8706, or motor vehicles for the transport of 16 or more persons provided for in subheading 8702.10 or 8702.90;
  - (B) motor vehicles provided for in subheading 8701.10 or any of subheadings 8701.30 through 8701.90;
  - (C) motor vehicles for the transport of 15 or fewer persons provided for in subheading 8702.10 or 8702.90, or motor vehicles provided for in subheading 8704.21 or 8704.31; or
  - (D) motor vehicles provided for in any of subheadings 8703.21 through 8703.90.
- (vi) For purposes of determining the regional value content under subdivision (g) of this note for automotive materials provided for in any of subheadings 8407.31 through 8407.34, in subheading 8408.20 or in heading 8409, 8706, 8707 or 8708, that are produced in the same plant, an importer, exporter or producer may—
- (A) average the amounts calculated under the net cost formula contained in subdivision (h)(i) over—
    - (1) the fiscal year of the motor vehicle producer to whom the automotive goods are sold,
    - (2) any quarter or month, or
    - (3) the fiscal year of the producer of such goods,if the goods were produced during the fiscal year, quarter or month that is the basis for the calculation;
  - (B) determine the average referred to in subdivision (h)(iii) separately for such goods sold to one or more motor vehicle producers; or
  - (C) make a separate determination under subdivision (h)(iii) or (h)(iv) for such goods that are exported to the territory of Korea or of the United States.
- (vii) The importer, exporter or producer of an automotive good shall, consistent with the provisions regarding allocation of costs provided for in generally accepted accounting principles, determine the net cost of the automotive good under subdivision (h)(ii) by—
- (A) calculating the total cost incurred with respect to all goods produced by the producer of the automotive good, subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the total cost of all such goods, and then reasonably allocating the resulting net cost of those goods to the automotive good;
  - (B) calculating the total cost incurred with respect to all goods produced by that producer, reasonably allocating the total cost to the automotive good, and then subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the portion of the total cost allocated to the automotive good; or

(C) reasonably allocating each cost that forms part of the total cost incurred with respect to the automotive good so that the aggregate of these costs does not include any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs or nonallowable interest costs.

(i) Accessories, spare parts or tools.

(i) Subject to subdivisions (ii) and (iii) of this subdivision, accessories, spare parts or tools delivered with a good that form part of the good's standard accessories, spare parts or tools shall--

(A) be treated as originating goods if the good is an originating good; and

(B) be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set forth in subdivision (o) of this note.

(ii) Subdivision (i)(i) shall apply only if--

(A) the accessories, spare parts or tools are classified with and not invoiced separately from the good; and

(B) the quantities and value of the accessories, spare parts or tools are customary for the good.

(iii) If the good is subject to a regional value content requirement, the value of the accessories, spare parts or tools shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.

(j) Fungible goods and materials.

(i) A person claiming that a fungible good or fungible material is an originating good may base the claim either on the physical segregation of the fungible good or fungible material or by using an inventory management method with respect to the fungible good or fungible material. For purposes of this subdivision, the term "inventory management method" means:

(A) averaging,

(B) "last-in, first-out,"

(C) "first-in, first out," or

(D) any other method that is recognized in the generally accepted accounting principles of the country in which the production is performed (whether Korea or the United States) or otherwise accepted by that country.

The term "fungible good" or "fungible material" means a good or material, as the case may be, that is interchangeable with another good or material for commercial purposes and the properties of which are essentially identical to such other good or material.

(ii) A person selecting an inventory management method under subdivision (j)(i) above for a particular fungible good or material shall continue to use that method for that fungible good or material throughout the fiscal year of such person.

(k) Packaging materials and containers.

(i) Packaging materials and containers in which a good is packaged for retail sale, if classified with the good for which the tariff treatment under the terms of this note is claimed, shall be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision (o) of this note and, if the good is subject to a regional value content requirement, the value of such packaging materials and containers shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.

(ii) Packing materials and containers for shipment shall be disregarded in determining whether a good is an originating good.

(l) Indirect materials.

GN p.663

Korea

An indirect material shall be disregarded in determining whether a good is an originating good under the terms of this note, except for purposes of subdivision (b)(ii)(B) of this note. The term “indirect material” means a good used in the production, testing or inspection of another good but not physically incorporated into that other good, or a good used in the maintenance of buildings or the operation of equipment associated with the production of another good, including—

- (i) fuel and energy;
  - (ii) tools, dies and molds;
  - (iii) spare parts and materials used in the maintenance of equipment or buildings;
  - (iv) lubricants, greases, compounding materials and other materials used in production or used to operate equipment or buildings;
  - (v) gloves, glasses, footwear, clothing, safety equipment and supplies;
  - (vi) equipment, devices and supplies used for testing or inspecting the good;
  - (vii) catalysts and solvents; and
  - (viii) any other good that is not incorporated into the other good but the use of which in the production of the other good can reasonably be demonstrated to be a part of that production.
- (m) Record-keeping requirements and verification; claims for preferential treatment.
- (i) An importer claiming preferential tariff treatment for a good imported into the territory of the United States under the provisions of this note shall comply in all respects with applicable Customs regulations. Importers shall, upon request by the appropriate customs officer, make available such records as are necessary under applicable regulations to demonstrate that a good qualifies as an originating good under the provisions of this note.
  - (ii) For purposes of determining whether a good imported into the customs territory of the United States from the territory of Korea qualifies as an originating good under the provisions of this note, the appropriate customs officer may conduct a verification under such terms or procedures as the United States and Korea may agree, as set forth in pertinent regulations.
  - (iii) An importer may make a claim for the tariff and other treatment provided for under the terms of this note based on either--
    - (A) a written or electronic certification by the importer, exporter or producer; or
    - (B) the importer's knowledge that the good is an originating good, including reasonable reliance on information in the importer's possession that the good is an originating good, in such form and manner as may be required in applicable regulations.
- (n) Interpretation of rules of origin.
- (i) Unless otherwise specified, a rule in subdivision (o) of this note that is set out adjacent and is applicable to a 6-digit subheading in the tariff schedule shall take precedence over a rule applicable to a 4-digit heading superior thereto and covering the goods of such subheading. For purposes of this subdivision and subdivision (o) of this note, a tariff provision is a “heading” if its article description is not indented; a provision is a “subheading” if it is designated by 6 digits under the Harmonized Commodity Description and Coding System.
  - (ii) Reference to weight in the rules set forth in subdivision (o) of this note for goods provided for in chapters 1 through 24 of the tariff schedule means dry weight, unless otherwise specified in the tariff schedule.
  - (iii) A requirement of a change in tariff classification in subdivision (o) of this note applies only to nonoriginating materials.
  - (iv) If goods are classified as a set as a result of the application of rule 3 of the general rules of interpretation of the tariff schedule, the set is originating under this note only if each good in the set is originating. Notwithstanding the first sentence of this subdivision, a set of goods is originating if the value of all the nonoriginating goods in the set does not exceed 15 percent of the adjusted value of the set.

- (v) A good of chapters 1 through 40, inclusive, shall not be considered to be originating solely by reason of mere dilution with water or another substance that does not materially alter the characteristics of the good.
- (vi) For purposes of applying this note to goods of chapters 6 through 14, inclusive, agricultural and horticultural goods grown in the territory of Korea or of the United States shall be treated as originating therein even if grown from seed, bulbs, rootstock, cuttings, grafts, shoots, buds or other live parts of plants imported from a country other than Korea or the United States.
- (vii) For purposes of applying this note to goods of chapters 27 through 40, inclusive (except a good of heading 3823), of the tariff schedule, a good that undergoes a chemical reaction as defined herein shall be treated as an originating good for purposes of this note, notwithstanding any product-specific rules enumerated in this note, provided all other applicable requirements are satisfied. A “chemical reaction” is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for purposes of this note:
  - (A) dissolving in water or other solvents;
  - (B) the elimination of solvents including solvent water; or
  - (C) the addition or elimination of water of crystallization.
- (viii) A good of heading in chapters 28 through 40 that satisfies one or more of the provisions enumerated in this subdivision shall be treated as an originating good for purposes of this note, except as otherwise specified in such provisions. Notwithstanding the preceding sentence, a good is an originating good if it meets the applicable change in tariff classification or satisfies the applicable value content requirement specified in the rules of origin in subdivision (o) for such chapters.
  - (A) A good of chapters 28 through 40 that is subject to purification shall be treated as an originating good provided that the purification occurs in the territory of Korea or of the United States, or both and results in the following:
    - (1) the elimination of not less than 80 percent of the impurities; or
    - (2) the reduction or elimination of impurities resulting in a good suitable:
      - (I) as a pharmaceutical, medicinal, cosmetic, veterinary or food grade substance;
      - (II) as a chemical product or reagent for analytical, diagnostic or laboratory uses;
      - (III) as an element or component for use in micro-elements;
      - (IV) for specialized optical uses;
      - (V) for non-toxic uses for health and safety;
      - (VI) for biotechnical use;
      - (VII) as a carrier used in a separation process; or
      - (VIII) for nuclear grade uses.
  - (B) A good of chapters 30, 31 or 33 through 40 (except for heading 3808) shall be treated as an originating good if the deliberate and proportionally controlled mixing or blending (including dispersing) of materials to conform to predetermined specifications, resulting in the production of a good having different essential physical or chemical characteristics that are relevant to the purposes or uses of the good and are different from the input materials, occurs in the territory of Korea or of the United States, or both.

- (C) A good of chapters 30, 31, 33 or 39 shall be treated as an originating good if the deliberate and controlled modification in particle size of the good, including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing or pressing, resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which is relevant to the purposes of the resulting good and having different essential physical or chemical characteristics from the input materials, occurs in the territory of Korea or of the United States, or both.
- (D) A good of chapters 28 through 38 shall be treated as an originating good if the production of standards materials occurs in the territory of Korea or of the United States, or both. For the purposes of this subdivision, "standards materials" (including standard solutions) are preparations suitable for analytical, calibrating or referencing uses, having precise degrees of purity or proportions that are certified by the manufacturer.
- (E) A good of chapters 28 through 39 shall be treated as an originating good if the isolation or separation of isomers from mixtures of isomers occurs in the territory of Korea or of the United States, or both.
- (F) A good of chapters 28 through 38 that undergoes a change from one classification to another in the territory of Korea or of the United States, or both, as a result of the separation of one or more materials from a man-made mixture shall not be treated as an originating good unless the isolated material underwent a chemical reaction in the territory of Korea or of the United States, or both.

  - (F) a nonoriginating material provided for in heading 1701 that is used in the production of a good provided for in any of headings 1701 through 1703;
  - (G) a nonoriginating material provided for in chapter 17 that is used in the production of a good provided for in subheading 1806.10;
  - (H) except as provided in subdivisions (A) through (G) above and subdivision (o) of this note, a nonoriginating material used in the production of a good provided for in any of chapters 1 through 24, unless the nonoriginating material is provided for in a different subheading than the good for which origin is being determined under this note;
  - (I) a nonoriginating material that is a textile or apparel good.
- (iii) For the purposes of this note, the term "adjusted value" means the value determined in accordance with Articles 1 through 8, Article 15 and the corresponding interpretive notes of the Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade 1994 referred to in section 101(d)(8) of the Uruguay Round Agreements Act (19 U.S.C. 3511(d)(8)), adjusted, if necessary, to exclude any costs, charges or expenses incurred for transportation, insurance and related services incident to the international shipment of the merchandise from the country of exportation to the place of importation.
- (f) Accumulation.
- (i) For purposes of this note, originating materials from the territory of Colombia or the United States that are used in the production of a good in the territory of the other country shall be considered to originate in the territory of such other country.
  - (ii) A good that is produced in the territory of Colombia or of the United States, or both, by one or more producers, is an originating good if the good satisfies all of the applicable requirements of this note.

    - (A) For the build-down method, the regional value content of a good may be calculated on the basis of the formula  $RVC = ((AV - VNM) / AV) \times 100$ , where RVC is the regional value content, expressed as a percentage; AV is the adjusted value of the good; and VNM is the value of nonoriginating materials that are acquired and used by the producer in the production of the good, but does not include the value of a material that is self-produced; or
    - (B) For the build-up method, the regional value content of a good may be calculated on the basis of the formula  $RVC = (VOM / AV) \times 100$ , where RVC is the regional value content, expressed as a percentage; AV is the adjusted value of the good; and VOM is the value of originating materials that are acquired or self-produced, and used by the producer in the production of the good.
  - (ii) Value of materials.
    - (A) For the purpose of calculating the regional value content of a good under subdivision (g)(i) and for purposes of applying the de minimis provisions of subdivision (e) of this note, the value of a material is:
      - (1) in the case of a material that is imported by the producer of the good, the adjusted value of the material;

- (3) in the case of a material that is self-produced, the sum of—
  - (I) all expenses incurred in the production of the material, including general expenses, and
  - (II) an amount for profit equivalent to the profit added in the normal course of trade.
- (B) The value of materials may be further adjusted as follows:
  - (1) for originating materials, the following expenses, if not included in the value of an originating material calculated under subdivision (A) above, may be added to the value of the originating material:
    - (I) the costs of freight, insurance, packing and all other costs incurred in transporting the material within or between the territory of Colombia or of the United States, or both, to the location of the producer;
    - (II) duties, taxes and customs brokerage fees on the material paid in the territory of Colombia or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable; and
    - (III) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or byproducts; and
  - (2) for non-originating materials, if included the value of a nonoriginating material calculated under subdivision (A) above, the following expenses may be deducted from the value of the nonoriginating material:
    - (I) the costs of freight, insurance, packing and all other costs incurred in transporting the material within or between the territory of Colombia or of the United States, or both, to the location of the producer;
    - (II) duties, taxes and customs brokerage fees on the material paid in the territory of Colombia or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable;
    - (III) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or by-products; or
    - (IV) the cost of originating materials used in the production of the nonoriginating material in the territory of Colombia or of the United States, or both.
- (C) All costs considered for the calculation of regional value content shall be recorded and maintained in conformity with the generally accepted accounting principles applicable in the territory of the country in which the good is produced (whether Colombia or the United States). The term "generally accepted accounting principles"--
  - (1) means the recognized consensus or substantial authoritative support given in the territory of Colombia or of the United States, as the case may be, with respect to the recording of revenues, expenses, costs, assets and liabilities, the disclosure of information and the preparation of financial statements, and
  - (2) may encompass broad guidelines for general application as well as detailed standards, practices and procedures.
- (h) Automotive goods.
  - (i) For purposes of subdivision (b)(ii)(B) of this note, the regional value content of an automotive good referred to in subdivision (o) of this note may be calculated by the importer, exporter or producer of the good on the basis of the following net cost method,  $RVC = ((NC - VNM) / NC) \times 100$ , where RVC is the regional value content, expressed as a percentage; NC is the net cost of the automotive good; and VNM is the value of nonoriginating materials that are acquired and used by the producer in the production of the automotive good, but does not include the value of a material that is self-produced.
  - (ii) For purposes of this subdivision, the term "automotive good" means a good provided for in any of subheadings 8407.31 through 8407.34, subheading 8408.20, heading 8409 or any of headings 8701 through 8708.

- (iii) For purposes of determining the regional value content under subdivision (h)(i) of this note for an automotive good that is a motor vehicle provided for in any of headings 8701 through 8705, an importer, exporter or producer may average the amounts calculated under the net cost formula contained in subdivision (h)(i), over the producer's fiscal year—
  - (A) with respect to all motor vehicles in any one of the categories described in subdivision (h)(iv), or
  - (B) with respect to all motor vehicles in any such category that are exported to the territory of Colombia or of the United States.
- (iv) A category is described in this subdivision if it—
  - (A) is the same model line of motor vehicles, is in the same class of motor vehicles and is produced in the same plant in the territory of Colombia or of the United States, as the good described in subdivision (h)(iii) for which regional value content is being calculated;
  - (B) is the same class of motor vehicles, and is produced in the same plant in the territory of Colombia or of the United States, as the good described in subdivision (h)(iii) for which regional value content is being calculated; or
  - (C) is the same model line of motor vehicles produced in the territory of Colombia or of the United States as the good described in subdivision (h)(iii) for which regional value content is being calculated.

For purposes of this subdivision, the term “model line of motor vehicles” means a group of motor vehicles having the same platform or model name.
- (v) The term “class of motor vehicles” means any one of the following categories of motor vehicles:
  - (A) motor vehicles provided for in subheading 8701.20, 8704.10, 8704.22, 8704.23, 8704.32 or 8704.90, or heading 8705 or 8706, or motor vehicles for the transport of 16 or more persons provided for in subheading 8702.10 or 8702.90;
  - (B) motor vehicles provided for in subheading 8701.10 or any of subheadings 8701.30 through 8701.90;
  - (C) motor vehicles for the transport of 15 or fewer persons provided for in subheading 8702.10 or 8702.90, or motor vehicles provided for in subheading 8704.21 or 8704.31; or
  - (D) motor vehicles provided for in any of subheadings 8703.21 through 8703.90.
- (vi) For purposes of determining the regional value content under subdivision (h) of this note for automotive materials provided for in any of subheadings 8407.31 through 8407.34, in subheading 8408.20 or in heading 8409, 8706, 8707 or 8708, that are produced in the same plant, an importer, exporter or producer may—
  - (A) average the amounts calculated under the net cost formula contained in subdivision (h)(i) over—
    - (1) the fiscal year of the motor vehicle producer to whom the automotive goods are sold,
    - (2) any quarter or month, or
    - (3) the fiscal year of the producer of such goods,if the goods were produced during the fiscal year, quarter or month that is the basis for the calculation;
  - (B) determine the average referred to in subdivision (h)(iii) separately for such goods sold to one or more motor vehicle producers; or
  - (C) make a separate determination under subdivision (h)(iii) or (h)(iv) for such goods that are exported to the territory of Colombia or of the United States.

- (vii) The importer, exporter or producer of an automotive good shall, consistent with the provisions regarding allocation of costs provided for in generally accepted accounting principles, determine the net cost of the automotive good under subdivision subdivision (h)(ii) by--
  - (A) calculating the total cost incurred with respect to all goods produced by the producer of the automotive good, subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the total cost of all such goods, and then reasonably allocating the resulting net cost of those goods to the automotive good;
  - (B) calculating the total cost incurred with respect to all goods produced by that producer, reasonably allocating the total cost to the automotive good, and then subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the portion of the total cost allocated to the automotive good; or
  - (C) reasonably allocating each cost that forms part of the total cost incurred with respect to the automotive good so that the aggregate of these costs does not include any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs or nonallowable interest costs.
- (viii) For purposes of this subdivision--
  - (A) the term "nonallowable interest costs" means interest costs incurred by a producer that exceed 700 basis points above the applicable official interest rate for comparable maturities of the country in which the producer is located;
  - (B) the term "total cost" means all product costs, period costs and other costs for a good incurred in the territory of Colombia or of the United States, or both; and does not include profits that are earned by the producer, regardless of whether they are retained by the producer or paid out to other persons as dividends, or taxes paid on those profits, including capital gains taxes;
  - (C) the term "product costs" means costs that are associated with the production of a good and include the value of materials, direct labor costs and direct overhead;
  - (D) the term "period costs" means costs, other than product costs, that are expensed in the period in which they are incurred, such as selling expenses and general and administrative expenses;
  - (E) the term "net cost" means total cost minus sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the total cost; and
  - (F) the term "other costs" means all costs recorded on the books of the producer that are not product costs or period costs, such as interest.
- (i) Accessories, spare parts or tools.
  - (i) Subject to subdivisions (ii) and (iii) of this subdivision, accessories, spare parts or tools delivered with a good that form part of the good's standard accessories, spare parts or tools shall--
    - (A) be treated as originating goods if the good is an originating good; and
    - (B) be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set forth in subdivision (o) of this note.
  - (ii) Subdivision (i)(i) shall apply only if--
    - (A) the accessories, spare parts or tools are classified with and not invoiced separately from the good; and
    - (B) the quantities and value of the accessories, spare parts or tools are customary for the good.

- (iii) If the good is subject to a regional value content requirement, the value of the accessories, spare parts or tools shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.

(j) Fungible goods and materials.

- (i) A person claiming that a fungible good or fungible material is an originating good may base the claim either on the physical segregation of the fungible good or fungible material or by using an inventory management method with respect to the fungible good or fungible material. For purposes of this subdivision, the term "inventory management method" means:
  - (A) averaging,
  - (B) "last-in, first-out,"
  - (C) "first-in, first out," or
  - (D) any other method that is recognized in the generally accepted accounting principles of the country in which the production is performed (whether Colombia or the United States) or otherwise accepted by that country.
- (ii) A person selecting an inventory management method under subdivision (j)(i) above for a particular fungible good or material shall continue to use that method for that fungible good or material throughout the fiscal year of such person.

(k) Packaging materials and containers.

- (i) Packaging materials and containers in which a good is packaged for retail sale, if classified with the good for which the tariff treatment under the terms of this note is claimed, shall be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision (o) of this note and, if the good is subject to a regional value content requirement, the value of such packaging materials and containers shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.
- (ii) Packing materials and containers for shipment shall be disregarded in determining whether a good is an originating good. For purposes of this subdivision, the term "packing materials and containers for shipment" means goods used to protect another good during its transportation and does not include the packaging materials and containers in which the other good is packaged for retail sale.

(l) Indirect materials.

For purposes of this note, an indirect material shall be treated as an originating material without regard to where it is produced. The term "indirect material" means a good used in the production, testing or inspection of another good but not physically incorporated into that other good, or a good used in the maintenance of buildings or the operation of equipment associated with the production of another good, including—

- (i) fuel and energy;
- (ii) tools, dies and molds;
- (iii) spare parts and materials used in the maintenance of equipment or buildings;
- (iv) lubricants, greases, compounding materials and other materials used in production or used to operate equipment or buildings;
- (v) gloves, glasses, footwear, clothing, safety equipment and supplies;
- (vi) equipment, devices and supplies used for testing or inspecting the good;
- (vii) catalysts and solvents; and

Colombia

- (viii) any other good that is not incorporated into the other good but the use of which in the production of the other good can reasonably be demonstrated to be a part of that production.
- (m) Claims for preferential tariff treatment; record-keeping requirements and verification.
- (i) Claims for preferential tariff treatment.--An importer may make a claim for the tariff and other treatment provided for under the terms of this note based on either--
- (A) a written or electronic certification by the importer, exporter or producer; or
- (B) the importer's knowledge that the good is an originating good, including reasonable reliance on information in the importer's possession that the good is an originating good;
- in such form and manner as may be required in applicable regulations.
- (ii) Record-keeping requirements.--An importer of a good, for which entry is claimed under the terms of this note, shall maintain, for a minimum of five years from the date of importation of the good, all records and supporting documents necessary to demonstrate that the good qualified for the tariff and other treatment provided for under the terms of this note, in such form and manner as may be required in applicable regulations. For purposes of this note, the term "records and supporting documents" includes, with respect to an exported good for which entry is claimed under the terms of this note, records and documents related to the origin of the good, including--
- (A) the purchase, cost and value of, and payment for, the good;
- (B) the purchase, cost and value of, and payment for, all materials, including indirect materials, used in the production of the good; and
- (C) the production of the good in the form in which it was exported.
- (iii) Verification.--For purposes of determining whether a good imported into the customs territory of the United States from the territory of Colombia qualifies as an originating good under the provisions of this note, the appropriate customs officer may conduct a verification as set forth in pertinent regulations.
- (n) Interpretation of rules of origin.
- (i) Unless otherwise specified, a rule in subdivision (o) of this note that is set out adjacent and is applicable to a 6-digit subheading in the tariff schedule shall take precedence over a rule applicable to a 4-digit heading superior thereto and covering the goods of such subheading. For purposes of this subdivision and subdivision (o) of this note, a tariff provision is a "heading" if its article description is not indented; a provision is a "subheading" if it is designated by 6 digits under the Harmonized Commodity Description and Coding System.
- (ii) A requirement of a change in tariff classification in subdivision (o) of this note applies only to nonoriginating materials. Where such a requirement is written to exclude tariff provisions at the level of a chapter, heading or subheading of the tariff schedule, it shall be construed to mean that the rule requires that materials classified in those excluded provisions must be originating for the good to qualify as an originating good. When a heading or subheading of the tariff schedule is subject to alternative specific rules of origin, a good classified in such a provision may be considered originating if it satisfies one of the alternatives. When a single rule is applicable to a group of headings or subheadings, and that rule specifies a change of heading or subheading, it shall be understood that the change in heading or subheading may occur within a single heading or subheading or between headings or subheadings of the group. When, however, a rule refers to a change in heading or subheading "outside that group," the change in heading or subheading must occur from a heading or subheading that is outside the group of headings or subheadings set out in the rule.
- (iii) Reference to weight in the rules set forth in subdivision (o) of this note for goods provided for in chapters 1 through 24 of the tariff schedule means dry weight, unless otherwise specified in the tariff schedule.
- (iv) For purposes of applying this note to goods of chapters 6 through 14, inclusive, agricultural and horticultural goods grown in the territory of Colombia or of the United States shall be treated as originating therein even if grown from seed, bulbs, rootstock, cuttings, grafts, shoots, buds or other live parts of plants imported from a country other than Colombia or the United States.

- (v) For purposes of applying this note to goods of chapters 27 through 40, inclusive (except a good of heading 3823), of the tariff schedule, a good that undergoes a chemical reaction as defined herein shall be treated as an originating good for purposes of this note, notwithstanding any product-specific rules enumerated in this note, provided all other applicable requirements are satisfied. A "chemical reaction" is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for purposes of this note:
- (A) dissolving in water or other solvents;
  - (B) the elimination of solvents including solvent water; or
  - (C) the addition or elimination of water of crystallization.
- (vi) A good of heading in chapters 28 through 40 that satisfies one or more of the provisions enumerated in this subdivision shall be treated as an originating good for purposes of this note, except as otherwise specified in such provisions. Notwithstanding the preceding sentence, a good is an originating good if it meets the applicable change in tariff classification or satisfies the applicable value content requirement specified in the rules of origin in subdivision (o) for such chapters.
- (A) A good of chapters 28 through 40 that is subject to purification shall be treated as an originating good provided that the purification occurs in the territory of Colombia or of the United States, or both and results in the following:
    - (1) the elimination of not less than 80 percent of the impurities; or
    - (2) the reduction or elimination of impurities resulting in a good suitable:
      - (I) as a pharmaceutical, medicinal, cosmetic, veterinary or food grade substance;
      - (II) as a chemical product or reagent for analytical, diagnostic or laboratory uses;
      - (III) as an element or component for use in micro-elements;
      - (IV) for specialized optical uses;
      - (V) for non-toxic uses for health and safety;
      - (VI) for biotechnical use;
      - (VII) as a carrier used in a separation process; or
      - (VIII) for nuclear grade uses.
  - (B) A good of chapters 30, 31 or 33 through 40 (except for heading 3808) shall be treated as an originating good if the deliberate and proportionally controlled mixing or blending (including dispersing) of materials to conform to predetermined specifications, resulting in the production of a good having different essential physical or chemical characteristics that are relevant to the purposes or uses of the good and are different from the input materials, occurs in the territory of Colombia or of the United States, or both.
  - (C) A good of chapters 30, 31, 33 or 39 shall be treated as an originating good if the deliberate and controlled modification in particle size of the good, including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing or pressing, resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which is relevant to the purposes of the resulting good and having different essential physical or chemical characteristics from the input materials, occurs in the territory of Colombia or of the United States, or both.
  - (D) A good of chapters 28 through 38 shall be treated as an originating good if the production of standards materials occurs in the territory of Colombia or of the United States, or both. For the purposes of this subdivision, "standards materials" (including standard solutions) are preparations suitable for analytical, calibrating or referencing uses, having precise degrees of purity or proportions that are certified by the manufacturer.

- (F) A good of chapters 28 through 38 that undergoes a change from one classification to another in the territory of Colombia or of the United States, or both, as a result of the separation of one or more materials from a man-made mixture shall not be treated as an originating good unless the isolated material underwent a chemical reaction in the territory of Colombia or of the United States, or both.
- (vii) With respect to textile and apparel goods imported under heading 9822.08.25, the following provisions shall apply:
- (A) A textile good of chapters 50 through 60 of the tariff schedule shall be considered to be an originating good under this note if it is wholly formed in the territory of Colombia or of the United States, or both, from—

- The originating fibers and yarns referred to in subdivision (A)(2) may contain up to 10 percent by weight of fibers or yarns that do not undergo an applicable change in tariff classification set out in subdivision (o) of this note. Any elastomeric yarn contained in such originating yarns referred to in subdivision (A)(2) must be formed in the territory of Colombia or of the United States, or both.
- (B) An apparel good of chapters 61 or 62 of the tariff schedule shall be considered to be an originating good under this note if it is cut or knit to shape, or both, and sewn or otherwise assembled in the territory of Colombia or of the United States, or both, and if the fabric of the outer shell, exclusive of collars and cuffs where applicable, is wholly of—
- (1) one or more fabrics listed in U.S. note 33 to subchapter XXII of chapter 98 of the tariff schedule; or
  - (2) one or more fabrics or knit to shape components formed in the territory of Colombia or of the United States, or both, from one or more of the yarns listed in such U.S. note 33; or

- The originating fabrics referred to in subdivision (B)(3) may contain up to 10 percent by weight of fibers or yarns that do not undergo an applicable change in tariff classification set out in subdivision (o) of this note. Any elastomeric yarn contained in such originating yarns referred to in subdivision (B)(3) must be formed in the territory of Colombia or of the United States, or both.
- (C) A textile good of chapters 42, 63 or 94 of the tariff shall be considered to be an originating good if it is cut or knit to shape, or both, and sewn or otherwise assembled in the territory of Colombia or of the United States, or both, and if the component that determines the tariff classification of the good is wholly of—
- (1) one or more of the fabrics listed in U.S. note 33 to subchapter XXII of chapter 98 of the tariff schedule;
  - (2) one or more fabrics or knit to shape components formed in the territory of Colombia or of the United States, or both, from one or more of the yarns listed in such U.S. note 33; or

  - (A) average the amounts calculated under the net cost formula contained in subdivision (h)(i) over—
    - (1) the fiscal year of the motor vehicle producer to whom the automotive goods are sold,
    - (2) any quarter or month, or
    - (3) the fiscal year of the producer of such goods,if the goods were produced during the fiscal year, quarter or month that is the basis for the calculation;
  - (B) determine the average referred to in subdivision (vi)(A) separately for such goods sold to one or more motor vehicle producers; or
  - (C) make a separate determination under subdivision (vi)(A) or (vi)(B) for such goods that are exported to the territory of Panama or of the United States.

The term “automotive materials” refers to such goods classified in the following provisions: subheadings 8407.31 through 8407.34 (engines) or 8708.20 (diesel engines for vehicles) and headings 8409 (parts of engines), 8706 (chassis), 8707 (bodies) and 8708 (motor vehicle parts).

- (vii) The importer, exporter or producer of an automotive good shall, consistent with the provisions regarding allocation of costs provided for in generally accepted accounting principles, determine the net cost of the automotive good under subdivision (h)(ii) by—
  - (A) calculating the total cost incurred with respect to all goods produced by the producer of the automotive good, subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the total cost of all such goods, and then reasonably allocating the resulting net cost of those goods to the automotive good;

- (B) calculating the total cost incurred with respect to all goods produced by that producer, reasonably allocating the total cost to the automotive good, and then subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the portion of the total cost allocated to the automotive good; or
  - (C) reasonably allocating each cost that forms part of the total cost incurred with respect to the automotive good so that the aggregate of these costs does not include any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs or nonallowable interest costs.
- (viii) For purposes of this note--
- (A) the term "nonallowable interest costs" means interest costs incurred by a producer that exceed 700 basis points above the applicable official interest rate for comparable maturities of the country in which the producer is located;
  - (B) the term "net cost" means total cost minus sales promotion, marketing, and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the total cost;
  - (C) the term "reasonably allocating" means apportioning in a manner that would be appropriate under generally accepted accounting principles; and
  - (D) the term "total cost" means all product costs, period costs and other costs for a good incurred in the territory of Panama or of the United States, or both.
- (i) Accessories, spare parts or tools.
- (i) Subject to subdivisions (ii) and (iii) of this subdivision, accessories, spare parts or tools delivered with a good that form part of the good's standard accessories, spare parts or tools shall--
    - (A) be treated as originating goods if the good is an originating good; and
    - (B) be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set forth in subdivision (o) of this note.
  - (ii) Subdivision (i)(i) shall apply only if--
    - (A) the accessories, spare parts or tools are classified with and not invoiced separately from the good, regardless of whether such accessories, spare parts or tools are specified or are separately identified in the invoice for the good; and
    - (B) the quantities and value of the accessories, spare parts or tools are customary for the good.
  - (iii) If the good is subject to a regional value content requirement, the value of the accessories, spare parts or tools shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.
- (j) Fungible goods and materials.
- (i) A person claiming that a fungible good or fungible material is an originating good may base the claim either on the physical segregation of the fungible good or fungible material or by using an inventory management method with respect to the fungible good or fungible material. For purposes of this subdivision, the term "inventory management method" means:
    - (A) averaging;
    - (B) "last-in, first-out";
    - (C) "first-in, first out"; or
    - (D) any other method that is recognized in the generally accepted accounting principles of the country in which the production is performed (whether Panama or the United States) or otherwise accepted by that country.

GN p.810

The term “fungible good” or “fungible material” means a good or material, as the case may be, that is interchangeable with another good or material for commercial purposes and the properties of which are essentially identical to such other good or material.

- (ii) A person selecting an inventory management method under subdivision (j)(i) above for a particular fungible good or fungible material shall continue to use that method for that fungible good or fungible material throughout the fiscal year of such person.

(k) Packaging materials and containers.

- (i) Packaging materials and containers in which a good is packaged for retail sale, if classified with the good for which the tariff treatment under the terms of this note is claimed, shall be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision (o) of this note and, if the good is subject to a regional value content requirement, the value of such packaging materials and containers shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.
- (ii) Packing materials and containers for shipment shall be disregarded in determining whether a good is an originating good. For purposes of this note, the term “packing materials and containers for shipment” means goods used to protect another good during its transportation and does not include the packaging materials and containers in which the other good is packaged for retail sale.

(l) Indirect materials.

For purposes of this note, an indirect material shall be treated as an originating material without regard to where it is produced. The term “indirect material” means a good used in the production, testing or inspection of another good but not physically incorporated into that other good, or a good used in the maintenance of buildings or the operation of equipment associated with the production of another good, including—

- (i) fuel and energy;
- (ii) tools, dies and molds;
- (iii) spare parts and materials used in the maintenance of equipment or buildings;
- (iv) lubricants, greases, compounding materials and other materials used in production or used to operate equipment or buildings;
- (v) gloves, glasses, footwear, clothing, safety equipment and supplies;
- (vi) equipment, devices and supplies used for testing or inspecting the good;
- (vii) catalysts and solvents; and
- (viii) any other good that is not incorporated into the other good but the use of which in the production of the other good can reasonably be demonstrated to be a part of that production.

(m) Record-keeping requirements and verification.

- (i) An importer claiming preferential tariff treatment for a good imported into the territory of the United States under the provisions of this note based on a importer’s certification or its knowledge (including reasonable reliance on information in the importer’s possession) that the good is an originating good shall maintain, for a minimum of five years from the date of importation of the good, all records necessary to demonstrate that the good qualified for the preferential tariff treatment claimed under this note.

- (ii) An importer claiming preferential tariff treatment for a good imported into the territory of the United States based on a certification issued by the exporter or producer shall maintain, for a minimum of five years from the date of importation of the good, a copy of the certification that served as the basis for the claim. If the importer possesses records demonstrating that the good satisfies the requirements to remain originating under subdivision (c)(iii) of this note, the importer shall maintain such records for a minimum of five years from the date of importation of the good; shall make a written declaration that the good qualifies as originating, under the terms of applicable regulations; and shall be prepared to submit, upon request by the appropriate customs officer, a certification of origin demonstrating that the good qualifies as an originating good under the provisions of this note, including pertinent cost and manufacturing information and all other information requested by such customs officer.
- (iii) A certification that a good is originating may be in written or electronic form, including but not limited to the following elements:
  - (A) the name of the certifying person, including as necessary contact or other identifying information;
  - (B) the importer of the good (if known);
  - (C) the exporter of the good (if different from the producer);
  - (D) the producer of the good (if known);
  - (E) the classification of the good in the tariff schedule and a description of the good;
  - (F) information demonstrating that the good is originating;
  - (G) the date of the certification; and
  - (H) in the case of a blanket certification of multiple shipments of identical goods within any period specified in the written or electronic certification, not exceeding 12 months from the date of the certification, the period of time that the certification covers. For purposes of this subdivision, the term "identical goods" means goods that are the same in all respects relevant to the rule of origin that qualifies the goods as originating goods.

Importers shall, upon request by the appropriate customs officer, make available such records as are necessary under applicable regulations to demonstrate that a good qualifies as an originating good under the provisions of this note.

- (iv) For purposes of determining whether a good imported into the customs territory of the United States from the territory of Panama qualifies as an originating good under the provisions of this note, the appropriate customs officer may conduct a verification under such terms or procedures as the United States and Panama may agree, as set forth in pertinent regulations.
- (n) Interpretation of rules of origin.
  - (i) Unless otherwise specified, a rule in subdivision (o) of this note that is set out adjacent and is applicable to a 6-digit subheading in the tariff schedule shall take precedence over a rule applicable to a 4-digit heading superior thereto and covering the goods of such subheading. For purposes of this subdivision and subdivision (o) of this note, a tariff provision is a "heading" if its article description is not indented; a provision is a "subheading" if it is designated by 6 digits under the Harmonized Commodity Description and Coding System.
  - (ii) Reference to weight in the rules set forth in subdivision (o) of this note for goods provided for in chapters 1 through 24 of the tariff schedule means dry weight, unless otherwise specified in the tariff schedule.
  - (iii) A requirement of a change in tariff classification in subdivision (o) of this note applies only to nonoriginating materials.
  - (iv) For purposes of applying this note to goods of chapters 6 through 14, inclusive, agricultural and horticultural goods grown in the territory of Panama or of the United States shall be treated as originating therein even if grown from seed, bulbs, rootstock, cuttings, grafts, shoots, buds or other live parts of plants imported from a country other than Panama or the United States.

- (v) For purposes of applying this note to goods of chapters 27 through 40, inclusive (except a good of heading 3823), of the tariff schedule, a good that undergoes a chemical reaction as defined herein shall be treated as an originating good for purposes of this note, notwithstanding any product-specific rules enumerated in this note, provided all other applicable requirements are satisfied. A "chemical reaction" is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for purposes of this note:
- (A) dissolving in water or other solvents;
  - (B) the elimination of solvents including solvent water; or
  - (C) the addition or elimination of water of crystallization.
- (vi) A good of heading in chapters 28 through 40 that satisfies one or more of the provisions enumerated in this subdivision shall be treated as an originating good for purposes of this note, except as otherwise specified in such provisions. Notwithstanding the preceding sentence, a good is an originating good if it meets the applicable change in tariff classification or satisfies the applicable value content requirement specified in the rules of origin in subdivision (o) for such chapters.
- (A) A good of chapters 28 through 40 that is subject to purification shall be treated as an originating good provided that the purification occurs in the territory of Panama or of the United States, or both and results in the following:
    - (1) the elimination of not less than 80 percent of the impurities; or
    - (2) the reduction or elimination of impurities resulting in a good suitable:
      - (I) as a pharmaceutical, medicinal, cosmetic, veterinary, or food grade substance;
      - (II) as a chemical product or reagent for analytical, diagnostic, or laboratory uses;
      - (III) as an element or component for use in micro-elements;
      - (IV) for specialized optical uses;
      - (V) for non-toxic uses for health and safety;
      - (VI) for biotechnical use;
      - (VII) as a carrier used in a separation process; or
      - (VIII) for nuclear grade uses.
  - (B) A good of chapters 30, 31 or 33 through 40 (except for heading 3808) shall be treated as an originating good if the deliberate and proportionally controlled mixing or blending (including dispersing) of materials to conform to predetermined specifications, resulting in the production of a good having different essential physical or chemical characteristics that are relevant to the purposes or uses of the good and are different from the input materials, occurs in the territory of Panama or of the United States, or both.
  - (C) A good of chapters 30, 31, 33 or 39 shall be treated as an originating good if the deliberate and controlled modification in particle size of the good, including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing or pressing, resulting in a good having a defined particle size, defined particle size distribution, or defined surface area, which is relevant to the purposes of the resulting good and having different essential physical or chemical characteristics from the input materials, occurs in the territory of Panama or of the United States, or both.
  - (D) A good of chapters 28 through 38 shall be treated as an originating good if the production of standards materials occurs in the territory of Panama or of the United States, or both. For the purposes of this subdivision, "standards materials" (including standard solutions) are preparations suitable for analytical, calibrating, or referencing uses, having precise degrees of purity or proportions that are certified by the manufacturer.

  - (F) A good of chapters 28 through 38 that undergoes a change from one classification to another in the territory of Panama or of the United States, or both, as a result of the separation of one or more materials from a man-made mixture shall not be treated as an originating good unless the isolated material underwent a chemical reaction in the territory of Panama or of the United States, or both.
- (vii) With respect to textile and apparel goods imported under heading 9822.09.62, the following provisions shall apply:

- (A) A textile good of chapters 50 through 60 of the tariff schedule shall be considered to be an originating good under this note if it is wholly formed in the territory of Panama or of the United States, or both, from—

Any elastomeric yarn contained in such originating yarns referred to in subdivision (A)(2) must be formed in the territory of Panama or of the United States, or both.

- (B) An apparel good of chapters 61 or 62 of the tariff schedule shall be considered to be an originating good under this note if it is cut or knit to shape, or both, and sewn or otherwise assembled in the territory of Panama or of the United States, or both, and if the fabric of the outer shell, exclusive of collars and cuffs where applicable, is wholly of—

- (1) one or more fabrics listed in U.S. note 39 to subchapter XXII of chapter 98 of the tariff schedule; or

Any elastomeric yarn contained in such originating yarns referred to in subdivision (B)(3) must be formed in the territory of Panama or of the United States, or both.

- (C) A textile good of chapter 63 or subheading 9404.90 of the tariff schedule shall be considered to be an originating good if it is cut or knit to shape, or both, and sewn or otherwise assembled in the territory of Panama or of the United States, or both, and if the component that determines the tariff classification of the good is wholly of—

- (1) one or more of the fabrics listed in U.S. note 39 to subchapter XXII of chapter 98 of the tariff schedule;
- (2) one or more fabrics or knit to shape components formed in the territory of Panama or of the United States, or both, from one or more of the yarns listed in such U.S. note 39; or

# Harmonized Tariff Schedule of the United States Revision 10 (2026)

Annotated for Statistical Reporting Purposes

GN p.876

Gen. Stat. Notes

## 2. Statistical Annotations.

- (a) The statistical annotations to the Harmonized Tariff Schedule of the United States consist of--
  - (i) the 2-digit statistical suffixes and any article descriptions applicable thereto,
  - (ii) the indicated units of quantity, and
  - (iii) the statistical notes and annexes.
- (b) The legal text of the Harmonized Tariff Schedule of the United States consists of the remaining text as more specifically identified in the general rules of interpretation.

## 3. Statistical Reporting Number.

- (a) Except as provided in paragraph (b) of this note, and in the absence of specific instructions to the contrary elsewhere, the statistical reporting number for an article consists of the 10-digit number formed by combining the 8-digit subheading number with the appropriate 2-digit statistical suffix. Thus, the statistical reporting number for live monkeys dutiable under subheading 0106.00.50 is "0106.00.5010".
- (b) Whenever in the tariff schedule an article is classifiable under a provision which derives its rate of duty from a different provision, the statistical reporting number is, in the absence of specific instructions to the contrary elsewhere, the 10-digit number for the basic provision followed by the 10-digit subheading number of the provision from which the rate is derived. Thus, the statistical reporting number for certain mountings for optical telescopes is "9005.90.8000-9005.80.4040". If multiple statistical reporting numbers are shown for the subheading from which the duty rate is derived and the shipment contains articles covered by more than one statistical reporting number from the subheading, then report the last applicable statistical reporting number only.
- (c) (i) Goods of a country with which the United States has a free trade agreement, that meet the terms of that agreement, when marked or eligible to be marked with their country of origin, and entered with any of the following special program indicators (SPIs) prefacing the 10-digit HTS number are exempt from the Merchandise Processing Fee (MPF):

## Chapter 98--Special Classification Provisions

### **Exports of Articles Previously Imported for Repair or Alterations; Instruments of International Traffic; Articles Donated for Relief or Charity, Not Elsewhere Specified or Included; Military Wearing Apparel; Military Equipment Not Identified By Kind**

#### Statistical Notes

1. For the purpose of Schedule B number 9801.10.0000, the value of repairs or alterations made in the United States shall be:
  - (a) Reported only for articles previously imported for repairs or alterations.
  - (b) The total cost of the repair or alteration (including parts and labor); or
  - (c) If no charge is made, the value to the exporter of such repair or alteration.
2. Shipping containers leaving the United States strictly as instruments of international traffic (i.e., in their capacity as carriers of merchandise), and not for sale or transfer of ownership, are not considered to be exported; therefore, such containers are not required to be reported on the Shipper's Export Declaration. However, they may be:
  - (a) Reported (if for any reason the exporter wishes to record their movement) under Schedule B number 9801.20.0000, whether loaded or empty; and
  - (b) The value reported for such instruments of international traffic shall exclude the value of the contents (if any) of such containers.
3. This chapter does not cover:
  - (a) Articles exported after having been imported temporarily under bond for processing (importations under statistical reporting number 9813.00.0520).
  - (b) Those food products donated for relief or charity provided for in chapter 1 through 16 when shipped individually in bulk.
  - (c) Shipments of commodities for relief or charitable purposes by government agencies, except used wearing apparel donated by government agencies.

I  
4-1

#### Notes

1. The expression "milk" means full cream milk or partially or completely skimmed milk.
2. For the purposes of heading 0403, yogurt may be concentrated or flavored and may contain added sugar or other sweetening matter, fruit, nuts, cocoa, chocolate, spices, coffee or coffee extracts, plants, parts of plants, cereals or bakers' wares, provided that any added substance is not used for the purpose of replacing, in whole or in part, any milk constituent, and the product retains the essential character of yogurt.
3. For the purposes of heading 0405:
  - (a) The term "butter" means natural butter, whey butter or recombined butter (fresh, salted or rancid, including canned butter) derived exclusively from milk, with a milkfat content of 80 percent or more but not more than 95 percent by weight, a maximum milk solids-not-fat content of 2 percent by weight and a maximum water content of 16 percent by weight. Butter does not contain added emulsifiers, but may contain sodium chloride, food colors, neutralizing salts and cultures of harmless lactic-acid-producing bacteria.
  - (b) The expression "dairy spreads" means a spreadable emulsion of the water-in-oil type, containing milkfat as the only fat in the product, with a milkfat content of 39 percent or more but less than 80 percent by weight.
4. Products obtained by the concentration of whey and with the addition of milk or milkfat are to be classified as cheese in heading 0406 provided that they have the three following characteristics:
  - (a) A milkfat content, by weight of the dry matter, of 5 percent or more;
  - (b) A dry matter content, by weight, of at least 70 percent but not exceeding 85 percent; and
  - (c) They are molded or capable of being molded.
5. This chapter does not cover:
  - (a) Non-living insects, unfit for human consumption (heading 0511);
  - (b) Products obtained from whey, containing by weight more than 95 percent lactose, expressed as anhydrous lactose calculated on the dry matter (heading 1702);
  - (c) Products obtained from milk by replacing one or more of its natural constituents (for example, butyric fats) by another substance (for example, oleic fats) (heading 1901 or 2106); or
  - (d) Albumins (including concentrates of two or more whey proteins, containing by weight more than 80 percent whey proteins, calculated on the dry matter) (heading 3502) or globulins (heading 3504).
6. For the purposes of heading 0410, the term "insects" means edible non-living insects, whole or in parts, fresh, chilled, frozen, dried, smoked, salted or in brine, as well as flours and meals of insects, fit for human consumption. However, it does not cover edible non-living insects, otherwise prepared or preserved (generally section IV).

#### Subheading Notes

1. For the purposes of subheading 0404.10, the expression "modified whey" means products consisting of whey constituents, that is, whey from which all or part of the lactose, proteins or minerals have been removed, whey to which natural whey constituents have been added, and products obtained by mixing natural whey constituents.
2. For the purposes of subheading 0405.10 the term "butter" does not include dehydrated butter or ghee (subheading 0405.90).
